

Applicant: DAMM Cellular Systems A/S

This document will serve as cover letter requesting limited modular approval on the following:

Modular approval requirements for DAMM Cellular TR412 and TR412H.

1. The module is completely shielded top and bottom.
2. The data for the module comes from another module and is completely buffered.
The RF transceiver module can only be operated in conjunction with the other dedicated components of the system.
3. The power for the module is either buffered on the module for some voltages used or from a voltage regulated power supply module that is dedicated to the system.
4. The system is a licensed device under part 90 of the FCC rules and as such the system can use various antennas.
5. The RF transceiver module is labeled as required (see exhibits).
6. The module is only installed by the grantee or authorized dealer and cannot be used in any other system than the ones supplied by the manufacturer (grantee).
7. The system is only operable as fixed installation equipment and under a licensed rule part.
