SUBJECT: Extended Frequencies Justification for ZW5-104012

Gentlemen

The TR412 is a 2-Way radio component and is designed to operate in the frequency bands 410-430 MHz.

To aid equipment authorization in other countries and which accept the United States FCC Grant for Certification, DAMM Cellular is requesting that the FCC lists the frequencies 410-430 MHz on the FCC Grant. For the FCC's Rule Parts 90 applications, this radio is used in LMR systems by e.g. Industrial sector, Transport, Utilities and Public Safety agencies including Police, Fire, and Emergency Medical Services.

Equipment programming is the responsibility of Authorized Service Personnel. Also, the radio complies with 47 CFR Part 90.203(e), in that the operator cannot directly program the transmit frequencies using the normally accessible external controls. Per the FCC's KDB634817 guidance, "as an alternative to listing the exact frequencies, we acknowledge that it's a violation of the FCC Rules if this device operates on unauthorized frequencies"

Sincerely,

Damm Cellular System A/S

Moritz Hynkemejer  
Sales Director
