Office of Engineering and Technology
Equipment Authorization Division

To whom it may concern,

Subject: FCC ID:

We request a Class II Permissive change to add an addition of the emission designator 20K0D7W and 21K0D7W.

No hardware changes were made to add these changes.

The grantee feels that both emission designators more aptly describe the type of modulation embodied by TETRA.

Attached please find an Occupied Bandwidth plot with Mask B that was inadvertently left out of the test report.

Best Regards,

A handwritten signature in blue ink is written over a circular purple stamp. The stamp contains the text 'TIMCO ENGINEERING, INC.' around the perimeter and a small asterisk at the bottom center.
