Re: FCC ID: Z5W-105002

Applicant: Damm Cellular Systems A/S

Correspondence Reference Number: 42776

Form 731 Confirmation Number: EA657517

Date of Original E-mail: 10/18/2012

Form 731 emission designators have been revised per your request. Please let me know if the listings do not agree with your intent.

Similar to the question raised in the FCC ID Z5W-105003 application, please clarify whether 0.6 Watts listing is necessary on the grant. This is dependent on when the 0.6 Watts power is present. In other words, please elaborate on the statement that the power "varies between 10.6 Watts and 0.6 Watts".

Your comment "represents the range of power control" is correct and the numbers are peak. The above is true for both roll off factors. In this case the lower power listed on the 731 form can be removed as you mentioned. A grant note like BC would best describe this..

The items indicated above must be submitted before processing can continue on the above referenced application.

Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee pursuant to Section 1.1108
