

Smart Wireless Floodlight Camera

Quick Start Guide

Model: E97A

Welcome

Thank you for choosing our Floodlight Camera. Getting started is easy.

1. What's Included

2. Shut power off at the breaker

If you don't know where your breaker is or how to turn off power to your floodlight circuit, consult with a licensed electrician.

WARNING: Risk of electrical shock

- Disconnect power at the fuse or circuit breaker before installing.
- Verify that the supply voltage is correct. Connect fixture to a AC100V-240V, 50/60 Hz power source.

CAUTION: Risk of fire

- Do not install near combustible or flammable surfaces.

NOTICE

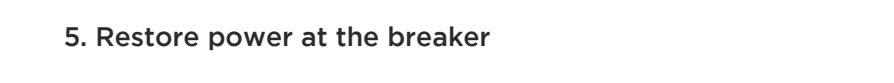

- Do not connect this light fixture to a dimmer switch or timer.
- Floodlight Camera must be installed on a wall and on a UL listed junction box.

3. How it fits all together

American gauge power cord color: Black , White, Yellow, green.
Connect Floodlight Camera cables with same color junction box cables.

4. Prepare your Floodlight Camera for installation

1. Loosen the knobs on the light fixtures to rotate them out of the way and allow access to the mounting screws.

2. According to your actual scene to adjust the view angle of camera

5. Restore power at the breaker

After restoring power, the lights will turn on and your Floodlight Camera will begin speaking to you to let you know it's in setup mode.

6.Connection Preparation

Please initial the Floodlight Camera within WiFi covered area to ensure the best working performance.

Router
Camera
Smartphone
(Support 30cm-100cm)

Note: Make sure smart phone is connected with your wireless router. Please note the camera is only working under 2.4G Wi-Fi, not support 5G Wi-Fi.

3. How it fits all together

Europe/Australia gauge power cord color: Blue , Brown, Yellow, green.
Connect Floodlight Camera cables with same color junction box cables.

7. Get the APP and Account

For the best experience, please download the "TuyaSmart" APP to your smartphone from App Store or Google Play, or you can also scan the QR code below, the APP icon will be displayed after installed successfully.

Launch the app from your smartphone and click the Sign up button. Follow the on-screen instructions.

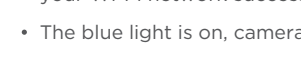

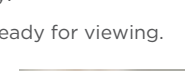

8.Connect the power to the camera

After installation, switch on the button.

9.Set up your camera

- Power the device on and make sure the indicator is red and flashing quickly or a prompt tone is heard.
- If the indicator is not red and flashing quickly, use the reset button to press the reset button of camera above 5 seconds, then release the button, a red LED on the front of camera will blink quickly.
- Follow App's instructions to complete network pairing process, the device will connect to your Wi-Fi network successfully.
- The blue light is on, camera is ready for viewing.

You're done!

Congratulations! Your camera is set up and ready to go.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 (1) This device may not cause harmful interference, and
 (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:
 This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
