March 24, 2015

Federal Communication Commission
7435 Oakland Mills Road
Columbia MD 21046

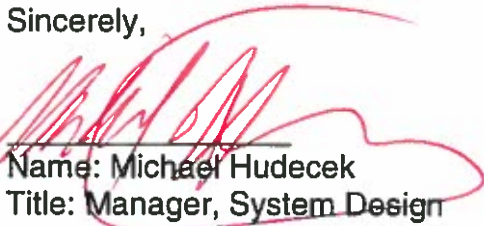

Subject: RF Justification Letter
FCC ID: Z64-WL18SBMOD

This letter confirms that the module (FCC ID: Z64-WL18SBMOD) is identical to the device originally approved by the commission on February 3, 2014 with the following exceptions:

- The 802.11b/g/n transmitter of the module will be disabled when integrated in the host.
- The module output power (Bluetooth v3.0+EDR and Bluetooth v4.0+LE) can be lowered in order to control the communication range of the host. The lower power is within the operating specifications of the modem.

Both changes are hardcoded within the software and are not accessible or adjustable by the end user.

Sincerely,

Name: Michael Hudecek
Title: Manager, System Design
