FINLAND

Re: Affirmation of compliance

We, Texas Instruments Incorporated ("TI"), write to you, Oxford Instruments Analytical, with reference to your proposed activities related to obtaining Industry Canada ("IC") approvals for the following envisaged changes to the TI WL18SBMOD module:

- (a) The module will be installed in a device which will be used near body (< 20 cm)
- (b) The module will be used with a different antenna than mentioned in the present certificate

In this regard, you, by itself or through your nominees (including Oxford Instruments Ltd.), propose to act on TI's behalf and represent TI before the IC and other pertinent authorities for the purposes of obtaining regulatory approvals and/or certifications.

As with its other business affiliates, TI reiterates to you its belief and expectation that you will maintain the highest ethical standards in representing TI. And, to this end, you, your employees, contractors, affiliates and representatives affirm that they will exercise all due diligence and avoid any activity that might result in a violation of any applicable U.S. or foreign anti-bribery laws; such activity may include, but not be limited to, offering or paying any public or commercial bribe or other benefit (direct or indirect) to any corporate entity, individual, government official or employee, candidate for public office, political party or other political organization. Accordingly, payments made by TI to you should not be used for any purposes or deployed in any manner not consonant with the foregoing standards/laws or which could result in any claim of non-compliance with such laws and standards against TI, its group companies or their employees.

If you agree with the foregoing, please have your authorized representative acknowledge in the space provided overleaf and return a signed copy to TI.

Thanking you,

Sincerely,

Texas Instruments Incorporated
