REMOTE BATTERY INFORMATION

- Slide open battery compartment 2. Install 6 "AA" batteries as shown in diagram 3. Replace and close battery compartment
- **⚠** LITHIUM-POLYMER BATTERY WARNING There is a risk of fire and personal injury if Li-Po
- battery is punctured, damaged or misused Never expose battery to extreme temperatures
- Do not subject battery to strong impacts Always keep battery away from flammable
- Only use manufacturer specified batter(ies), charger(s), and/or adapters, if applicable,
- specified by the manufacturer Battery is not serviceable
- Let battery cool to room temperature before While charging, never leave battery unattended Recycle or dispose of battery according to federal,
- state and local laws KEEP THIS INSTRUCTION MANUAL FOR REFERENCE

BATTERY WARNING · Do not mix old and new batteries

Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) Insert batteries using the correct polarity. Do not short-circuit the supply terminal Only use manufacturer specified batter(ies), charger(s), and/or adapters, if · Always use, replace, and recharge (if applicable) batteries under adult supervision KEEP THE PACKAGE FOR REFERENCE AS IT CONTAINS IMPORTANT INFORMATION

Step 4 - Lift Off

OPERATING DRONE

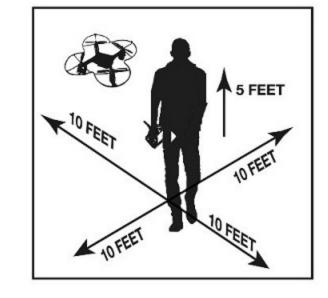

- Read all warnings and instructions
- are powered off Install Blade Guards Drone, page 6.
- Charge batteries, page 3. Step 2 - Choosing a location

· Drone is designed to be flown indoors

- Always make sure you have enough space to fly drone
- Always follow warnings, page 1
- Step 3 Starting Drone 1. Making sure your remote is off, slide
- drone switch to ON. Drone lights will begin to flicker
- Choose a flat even surface and
- follow the diagram 3. Turn remote on. Bring the Throttle all the way up then bring it all the way down. Remote will beep and drone

lights will flicker rapidly then turn on

permanently once paired. Drone is ready for flight.

Step 1 – Pre Flight Checklist

- Slowly and carefully bring the throttle up. Propellers will begin to spin and drone will begin to elevate. You can compensate for some of the 2. Install remote batteries, page 2 drones drifting by using the Multi Directional 3. Make sure that drone and remote Button or by following step 5. You may need to
 - Step 5 Drone Begins to Drift Follow this step if your drone begins to drift while

practice this step several times before

successfully getting drone into the air.

- take off or during flight · Drone drifts backwards: Slide the Forward/Backwards Adjustment up · Drone drifts forwards: Slide the
 - Forward/Backwards Adjustment down · Drone drifts left: Slide the Side to Side Adjustment to the right. Drone drifts right: Slide the Side to Side Adjustment to the left.
 - Drone spins clockwise (viewing drone from top): Slide the Spin Adjustment to the left Drone spins counter-clockwise (viewing drone from top): Slide the Spin Adjustment to the right.
- Always turn off remote prior to retrieving or picking up drone. This will help you avoid accidently activating propellers.
- Step 6 Operating Drone in Flight The drones range is approximately 150 feet
 - Maintain your desired elevation by using the Throttle

Read and be aware of all warnings found

- Use the Throttle joystick in a circle motion to spin the drone
- Use the Multi Directional Joystick to move forwards, backwards, and side to side

MODES

Auto Landing Button

- · Make sure you have achieved level, balanced flight, where the drone is neither climbing nor descending. This mode allows you to safely and slowly land your drone without having to control the speed. It is done for you automatically. · The ideal auto landing height is 25-30 ft.
- Press the "-" button to trigger auto land. Remote will beep continuously until drone lands Do NOT touch the left control stick. This will interrupt the landing sequence.
- To steer the drone during landing, use the right control until drone has reached the ground. Press the "-" button again to exit auto landing mode. NOTE: Please make sure the throttle joystick is on down position before exit auto landing mode

· Remote will beep every 6s to indicate the drone is in Auto Orientation mode.

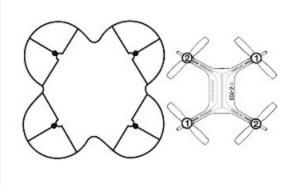

- Auto Orientation Button
- · Auto Orientation default setting is off. To enter this mode press Auto Orientation "+" button. Remote
- After drone success paired, the 2 white LED lights toward orientation will be the original forward orientation, when drone is in auto orientation mode, whatever the drone spin, the forward orientation will be previous original forward orientation.
- To exit mode, press the "+" button. Remote will sound 1 long beep indicating that it has exited Auto Orientation mode.

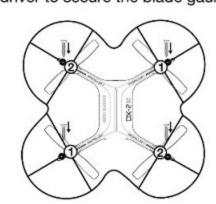

Stunt Button

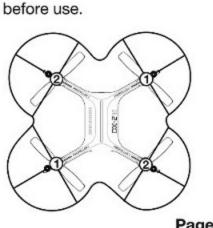

- Once you are comfortable flying the drone, use the Stunt Button to perform acrobatic stunts. 1. Hover the drone to at least above 10 feet.
 - 2. Press the Stunt Button. You will hear beeping coming from the remote 3. Move the Multi Directional Button to the desired direction that you would like the drone to flip
 - 4. Once you are comfortable with Stunt Mode, you can create multiple flips. Press the Stunt Button and then move the Multi Directional Button to the desired direction you would like the drone to flip, continue to hold the joystick in the desired direction of the stunt. The drone will

continue to flips in the direction you held the joystick, for a maximum of 3 stunts in a row.

 Click blade guards in place per diagrams below. · Use provided screws and a small screwdriver to secure the blade gaurds before use.

SHARPER IMAGE

Rechargeable 2.4GHz DX-2 STUNT DRONE

· Do not crash drone into sand or dirt. Drone gears may become clogged

- · When first learning to fly, practice lifting off and hovering Stay several feet from walls and buildings · Always Press Throttle all the way down after crashing or when something gets stuck in propellers
- · Never fly drones above or near people, sudden changes in wind or other conditions could lead to unexpected crashes. · Always use caution when flying drone vehicles, obey relevant laws, respect the privacy and property rights of others. The drone shall never be modified or used for anything except its intended purpose.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

TROUBLESHOOTING:

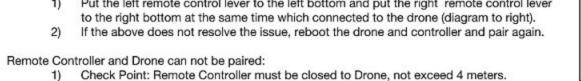

When remote switch is turned on, the remote light does not illuminate: Check that batteries in the remote are installed correctly OR Replace with new batteries

Drone and remote properly pair, but the drone will not lift-off:

When the remote is switched on, the remote LED is flashing and remote is beeping: 1) Remote batteries are low; replace them with new batteries

) Drone Li-Po needs charging. Use charging cable to connect the drone to power source. After trimming the drone, the drone flight is very unstable and cannot fly properly: One or more blades are most likely damaged;

Turn off the drone and remote. Replace with the proper number replacement blade and try flying again. After impact, the drone is unstable:) Put the left remote control lever to the left bottom and put the right remote control lever

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to

provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio commu-nications. However there is no guarantee that interference will not occur in a

Note: If there are 2 sets of Drones within 4 meters for Pairing, you must pair one successfully before pairing the second set.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on the user is encouraged to try to correct the interference by one or more of the following measures:

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.
