BATTERY INSTALLATION

The vehicle requires 4 AA (1.5V) batteries (not included). The controller requires one AA (1.5V) battery (not included). For best performance, use the same brand alkaline batteries for the best performance.

- Remove the battery cover from the back of the vehicle.
- Insert the 4 AA batteries into the battery compartment, observing the correct polarity (Fig. 1).
- Slide the battery cover on the back of the controller down to open.
- Insert one AA battery into the controller, observing the correct polarity (Fig. 2).
- Slide the battery cover on the controller down to open.
- Switch both the vehicle and controller power switches to the "ON" position.
- Adjust the steering and throttle trims (located on the bottom of the vehicle) to your preference.

SAFETY PRECAUTIONS

- Do not operate the vehicle on uneven terrain.
- Do not operate the vehicle on wet surfaces.
- Do not submerge the vehicle or controller in water.
- Always use caution when operating the vehicle.
- Remove all batteries when not in use to avoid accidental operation.
- Never use the vehicle as a crane or hoist.
- Do not run your vehicle into furniture, objects or hard surfaces, as this will damage the vehicle.
- Always use caution when operating the vehicle.
- Do not use the vehicle in areas with overhead power lines.
- Do not use the vehicle in areas with overhead power lines.
- Do not use the vehicle in areas with overhead power lines.

BATTERY WARNINGS

- Do not use the vehicle in areas with overhead power lines.
- Do not use the vehicle in areas with overhead power lines.
- Do not use the vehicle in areas with overhead power lines.
