CONNET TO PC

1. Mass Storage Mode (When in use of external memory card) Power on your digital camera and Press Preview/play button and Connect your digital Video to a computer, it will turn to mass Storage Mode. In mass Storage Mode, Your Digital Video acts exactly like a hard disk. That means you can access it via the Windows user interface. You can copy, move or delete pictures or movies exactly the way you manipulate files.

(Note: For Windows Me 2000 and XP, there is no need to install the mass storage driver from the CD ROM. Driver installation is only needed for Windows 98)

2. PC Camera Mode

Power on your digital camera and connect it to your PC via USB cable provided, press shutter button till you see the screen showed PC camera:

. Then go to [Start] [Programs] [Sunplus Ca533a] , run Amcap.
Using as a PC/Web Camera

1. The webcam allows you to broadcast moving images over the Internet.
When your camera is connected to the USB port it can be used as a PC/Web camera.

2. Open the camera first then connect this Digital Video to a computer with its supplied USB cable and the screen will show PC camera . Go to program->Sunplus Ca533a>Amcap, run Amcap

You will see it works as a PC cam!

If you have a MSN Messenger or Yahoo account, you can have a video conference face to face Online.

Installing the driver and photo-editing Software

You must install all software before connecting the Digital Video to your computer

Using Arcsoft

(Not Available for Mac)

By connecting your Digital Video to a computer, the Arcsoft opens. Meanwhile your Digital Video switches to Mass Storage Mode too. You may choose either to transfer the camera data through Arcsoft program or through Mass Storage Mode.

- a) Click start->program->Arcsoft Camera Suite->Photo Impression 4 to execute Photo Impression 4.
- b) Arcsoft program operation manual is included!!

Important notice:

- Don't cover the lens with hand or strap.
Keep the camera neatly (especially the lens, viewfinder and LCD display).
Use soft cotton cloth or tissue to wipe the dust on camera or LCD display.
Blow the dust and gain off from the lens or viewfinder carefully. Normally don't try to clean it. In case clean needed please kindly use professional lotion to wipe out gently, and then wipe to dry with good quality tissue or professional lens paper.
- Don't shoot under strong light long time.
- Don't put the camera in wet place.

FCC NOTE:

THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1. This device may not cause harmful interference, and 2. This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
