

Technical Description

The equipment under test (EUT) is TV Soundbar with Bluetooth function.

The EUT was power by AC 110-120 V#60Hz .

For more details information pls, refer to the user manual.

Channel List

2474	2475	2476	2477	2478	2479	2480		

Modulation Type: Π /4DQPSK, 8DPSK, GFSK

Bluetooth Version: 3.0

Antenna Type: Integral antenna

Antenna Gain: 2dBi

The nominal radiated output power (e.i.r.p) specified: 3dBm (Tolerance: +/- 4dB)

The function of main IC is mentioned as below.

- 1) U201 acts as Touchkey IC. (Touthkey board)
- 2) U201 acts as OP IC. (Main board)
- 3) U202 acts as NAND IC.
- 4) U203 acts as Switch IC.
- 5) U204 acts as S/Pdif decoder IC
- 6) U205 acts as Audio Processor IC
- 7) U206 acts as Power amplifier IC
- 8) U207 acts as MCU IC.
- 9) U208 acts as EEPROM IC
- 10) U209 acts as LDO IC
- 11) U210 acts as LDO IC
- 12) U211 acts as Reset IC.
- 13) Y201 is a 12.288MHz oscillator
- 14) U801 acts as MCU IC.
- 15) U803 acts as FLASH IC
- 16) Y801 is a 32.768KHz oscillator

In Bluetooth Module:

- 1) U5 acts as Bluetooth Chip.
- 2) Y1 is a 26MHz oscillator for Bluetooth Chip.
