EST Technology Co. ,Ltd Report N

### **Maximum Permissible Exposure**

## 1. Applicable Standards

Systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess limit for maximum permissible exposure. In accordance with 47 CFR FCC Part 2 Subpart J, section 2.1091 this device has been defined as a mobile device whereby a distance of 0.2m normally can be maintained between the user and the device.

#### 1.1. Limits for Maximum Permissible Exposure (MPE)

#### (a) Limits for Occupational/Controlled Exposure

| Frequency  | Electric Field | Magnetic Field | Power Density (S) | Averaging Times                        |
|------------|----------------|----------------|-------------------|--|
| Range      | Strength (E)   | Strength (H)   | $(mW/cm^2)$       | $\mid E \mid^2$ , $\mid H \mid^2$ or S |
| (MHz)      | (V/m)          | (A/m)          |                   | (minutes)                              |
| 0.3-3.0    | 614            | 1.63           | (100)*            | 6                                      |
| 3.0-30     | 1842/f         | 4.89/f         | (900/f)*          | 6                                      |
| 30-300     | 61.4           | 0.163          | 1.0               | 6                                      |
| 300-1500   |                |                | F/300             | 6                                      |
| 1500-10000 |                |                | 5                 | 6                                      |

#### (b) Limits for General Population / Uncontrolled Exposure

| Frequency   | Electric Field | Magnetic Field | Power Density (S) | Averaging Times               |
|-------------|----------------|----------------|-------------------|-------------------------------|
| Range (MHz) | Strength (E)   | Strength (H)   | $(mW/cm^2)$       | $  E ^2,  H ^2 \text{ or } S$ |
|             | (V/m)          | (A/m)          |                   | (minutes)                     |
| 0.3-1.34    | 614            | 1.63           | (100)*            | 30                            |
| 1.34-30     | 824/f          | 2.19/f         | (180/f)*          | 30                            |
| 30-300      | 27.5           | 0.073          | 0.2               | 30                            |
| 300-1500    |                |                | F/1500            | 30                            |
| 1500-10000  |                |                | 1.0               | 30                            |

Note: f=frequency in MHz; \*Plane-wave equivalent power density

EST Technology Co. ,Ltd Report No. ESTE-R2103109

#### 1.2. MPE Calculation Method

$$E (V/m) = \frac{\sqrt{30 \times P \times G}}{d}$$
 Power Density: Pd  $(W/m^2) = \frac{E^2}{377}$ 

E = Electric Field (V/m)

P = Peak RF output Power (W)

G = EUT Antenna numeric gain (numeric)

d = Separation distance between radiator and human body (m)

The formula can be changed to

$$Pd = \frac{30 \times P \times G}{377 \times d^2}$$

From the peak EUT RF output power, the minimum mobile separation distance, d=0.2m, as well as the gain of the used antenna, the RF power density can be obtained

# 2. Conducted Power Result

# Antenna 0

| Mode   | Frequency | Peak output power | Peak output | Target power | Antenna gain |          |
|--------|-----------|-------------------|-------------|--------------|--------------|----------|
|        | (MHz)     | (dBm)             | power (mW)  | (dBm)        | (dBi)        | (Linear) |
| GFSK   | 2402      | 6.75              | 4.732       | 7±1          | 2.59         | 1.82     |
|        | 2441      | 6.39              | 4.355       | 6±1          | 2.59         | 1.82     |
|        | 2480      | 6.25              | 4.217       | 6±1          | 2.59         | 1.82     |
| 8-DPSK | 2402      | 9.66              | 9.247       | 10±1         | 2.59         | 1.82     |
|        | 2441      | 9.33              | 8.570       | 9±1          | 2.59         | 1.82     |
|        | 2480      | 9.47              | 8.851       | 9±1          | 2.59         | 1.82     |
