The xTAG is a development tool for *Bluetooth* low energy applications in the 2.4GHz ISM band.

The xTAG has an on-board PCB inverted F type antenna. The xTAG is an engineering development board and cannot be used in an end product.

Texas Instruments Norway AS requests Nemko AS to do all necessary testing on the xTAG to be FCC certified according to FCC CFR 47 Part 15.247 for systems operating in the 2.4GHz ISM band.

A handwritten signature in blue ink, appearing to read 'Magnus Wines', written over a horizontal line.
