ZLLRC is a CC2530 based development tool for IEEE802.15.4 lighting solutions in the 2.4GHz ISM band. The CC2530 is a System-on-Chip solution tailored for 2.4-GHz ZigBee Applications.

ZLLRC has an on-board PCB antenna. The board comes in a remote control housing in order to demonstrate typical use case scenarios. ZLLRC is an engineering development board and cannot be used in an end product.

Texas Instruments Norway AS requests Nemko AS to do all necessary testing on the ZLLRC board to be FCC certified according to FCC CFR 47 Part 15.247 for systems operating in the 2.4GHz ISM band.

A handwritten signature in blue ink, appearing to read 'Magnus Wines', written over a horizontal line.
