Subject: Globalstar Certification of the Sypes Canyon Communications ZeMo,
Model SC1

Dear Mr. Naden,

As the satellite service provider, Globalstar, Inc. ("Globalstar") requires that before any product is allowed to be activated and operated on the Globalstar Satellite Communications System ("Globalstar system") such product must be Globalstar Certified. The Globalstar Certification process ensures that the product meets the applicable technical requirements for use with the Globalstar system including, but not limited to, MES signaling functions and methods for accessing the satellite system. Upon receiving Globalstar Certification, the product is authorized for activation and use on the Globalstar system. If a product fails to achieve Globalstar Certification, the product will not be allowed to be activated or used on the Globalstar system.

The Sypes Canyon Communications product ZeMo, (Model SC1) has passed the Globalstar Certification tests for MES signaling functions and access to the satellite system. These tests have shown that the ZeMo operates satisfactorily in accordance with Globalstar's requirements.

Regards,

Joseph C. Crowley
Manager, Product Certification
