June 14, 2011

Regarding to the Pubic Notice DA 00-1407 pertaining to PART 15 UNLICENSED MODULAR TRANSMITTER APPROVAL, **SHENZHEN MTN ELECTRONICS CO.,LTD.** would like to request modular approval for the submission FCC ID: ZBXMTO-WA718N-A1. **SHENZHEN MTN ELECTRONICS CO.,LTD.** confirms that the product complies with numbered requirements identified below:

Modular Approval is being requested for this device. The following statements detail these requirements and the manner in which the device meets them. The module has its own complete RF transceiver with built in antenna and reference oscillator. The module meets all of the technical specifications applicable to the frequency band of operation.

1. RF Shielding

The module contains metal shield over the transmitter section to ensure that it does not have to rely upon shielding provided by the device into which it is installed and to prevent coupling into which the device will be installed.

2. Buffered Modulation / Data Inputs

Data to the modulation circuit is buffered on the module via the integrated circuit. Refer to the information regarding the on-board Serdes (SPI) provided with the file "Data Sheet RTL8196C" that details the theory of operation.

3. Power Supply Regulation

Power supply regulation is provided within the integrated circuit that regulates the control voltage to the RF and data circuitry. The maximum allowable voltage that can be used in the chip is 3.3VDC – 3.5VDC. The variable input voltage is therefore a voltage regulator.

4. Antenna Requirements

The module uses a mini coaxial connector U.FL for adaptation of an external antenna.

5. The modular transmitter must be tested in a stand-alone configuration

Test data contained in this application is for the device tested as a stand alone device. Radiated spurious emissions data demonstrating compliance with the requirements of Part 15 of the FCC rules for intentional radiators has been provided. Please refer to the test report for details.

**SHENZHEN MTN ELECTRONICS CO.,LTD.**

MTN Industrial Park, No. 3 Fuhua Road, Pingxi Neighborhood,  
Pingdi Town , Longgang District, Shenzhen

6. The modular transmitter must be labeled with its own FCC ID number

The module itself is appropriately labeled with its own FCC ID. When the module is installed inside another device or in a casing, the exterior label will make reference to the enclosed module and its FCC ID. Refer to the label location and drawings contained within this application. The MTO-WA718N-A1 User Manuals contain specific references for exterior end product label requirements, including the use of the wording “Contains 802.11bgn Module FCC ID ZBXMTO-WA718N-A1”.

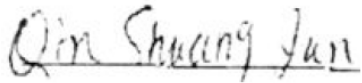

7. Operating requirements

The module has no serviceable parts. The Digital Electronic Device manufacturer has control to the module via the serial data for data transmission modes and data rates as well as predefined output power settings. This can be seen in the “Operation Description and User Manual” provided.

8. RF Exposure requirements

The module meets the requirements for a any applicable as per FCC RF exposure requirements and requires a separation distances of 20cm between the radiating structure and human as reflected in the module’s MTO-WA718N-A1 User Manual.

Sincerely,

Shuangyun Qin / Manager
