Safety Information

Please carefully read the terms below:

Use Safely

Do not use the phone in situations where it might cause

danger.

Transportation Safety

Please observe all transportation laws and regulations.

Please drive with both hands on the wheel.

Hospital Safety

Please follow hospital rules and limitations.

Please turn off your mobile phone when near medical instruments.

Airport Safety

Remember to follow all airport and flight safety regulations.

Please do not use your phone during flight.

Chemical Warning

Do not use your mobile phone around fuels or chemicals.

Temperature Warning

Do not subject your phone to extreme temperature conditions.

Water Hazard

Your phone is not waterproof. Keep it away from water and liquids.

Emergency Calls

Make sure your mobile phone is switched on and in a service area. In home screen, tap the phone key and dial the emergency number.

Accessories and Batteries

Use only Blu authorized batteries and accessories.

Information Backup

Remember to keep a written record of all important information.

Introduction

SIM/SD card and battery Installation Guide

Installation of the SIM Cards

Advisory: Please keep the SIM card out of the reach of children. The SIM card and its contact are easily damaged due

to scratching or bending. Please be cautious when carrying, installing or taking out the SIM card. ***BN:*** *Contact your cellular phone service provider directly to obtain the SIM card.*

To insert SIM card:

1. Remove the rear cover. Insert the SIM card.
2. Insert the SD card. (For additional storage capacity)
3. Insert the battery, replace the rear cover, and power on.

Charging The Battery

When you first get your new phone you'll need to charge the battery.

1. Connect the adapter to the charger jack. Ensure that the adapter is inserted with the correct orientation. Do not force the connector into the charger jack.
2. Connect the charger to a standard AC wall outlet.
3. Disconnect the charger when the battery is fully charged.

Power On and Off

On - Please ensure the SIM card has been properly inserted into the phone. Long press the Power key to switch on the phone.

Off - In standby mode, long press on Power key until an

options menu appears. Select Power Off in the pop-up prompt to switch off the phone.

Waking Up Your Phone

1. You may Press **Power Key** to activate your screen display.
2. Drag up the  icon.

NOTE: If you have set an unlock pattern, PIN or password for your phone, you'll need to draw the pattern or enter the PIN/password to unlock your screen. For further information regarding password locks, password revision and other functions please enter the security settings of the phone.

Switching to Sleep Mode

To save battery power, Sleep Mode suspends your device to a low-power-consumption state while the display is off. Your device also goes into Sleep Mode by itself when the display is automatically turned off after a certain period of time. You can start sleep mode by the following method.

Press **Power Key** to switch to Sleep Mode.

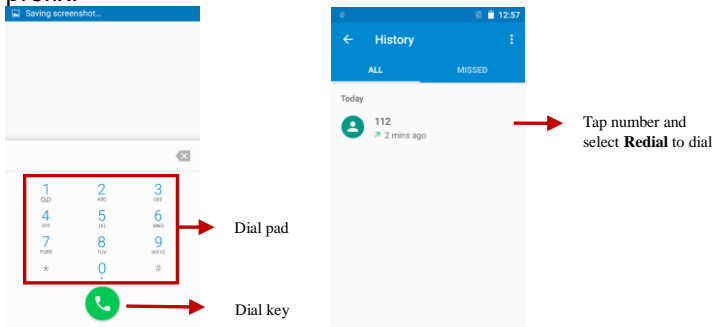

Home Screen

In the Home screen, besides the shortcut icon is displayed, you can also set your own wallpaper, add the widgets or

application shortcuts you need, or remove them as you like.

Call Functions

At the dial keyboard, enter the phone number and then click the dial key. If dialing an extension, you may click the dial pad icon in the bottom of the screen to open the interface and enter the number of the extension. You may also press and hold the 0 key to add a (+) sign when adding an international dialing prefix.

Call Logs

Every telephone number called and received will be saved in the phone's call history. All numbers in the call log can be dialed directly by clicking the number and selecting **REDIAL** on the screen. When the number appears on the list, click it and select **DETAILS** to view details. To clear all the call history, press the menu key and select **Clear call history**. You may remove one or multiple calls.

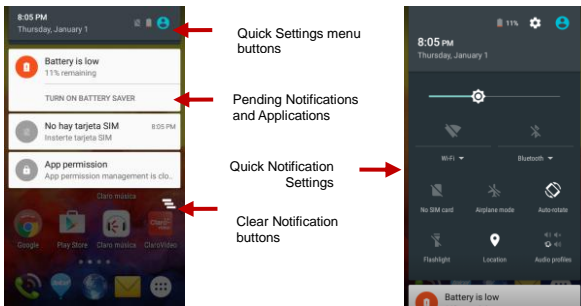

Call Options

There are different options that can be used in the call history and dialing interface. You may tap the option icon (☰) while in the dial interface and adjust speed dial and call settings.

Notifications Bar

The notification bar is located on the top of the screen which contains useful and important information regarding your phone and the applications that are installed. On the notification bar, several icons will appear such as signal bar,

battery indicator, data indicator and Bluetooth. You may flick the status bar downwards from across the top of the screen to open the Notification Panel to display any pending notifications or actions.

Notification Settings

The notification settings window provides shortcuts to different phone settings for quick access. Click on any of the shortcut notification icons to power on or off.

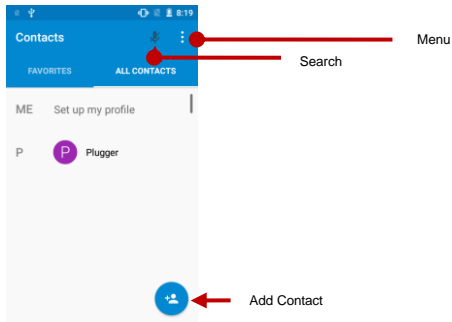

Note: To remove pending notifications, drag down the

notification bar and click the clear notification icon on the under right hand part of the screen (3 horizontal lines). The notification settings menu is located by dragging down the notification bar and is located on the upper right hand part of the screen next to the battery icon.

Contacts

You can add contacts on your phone and synchronize them with the contacts in your Google account or other accounts that support contact syncing. By tapping *the voice search icon on the under right hand part of the screen*, you can say the name to find contacts.

- The default display is the phone contacts and SIM card contacts.
- The contacts are organized alphabetically by default.

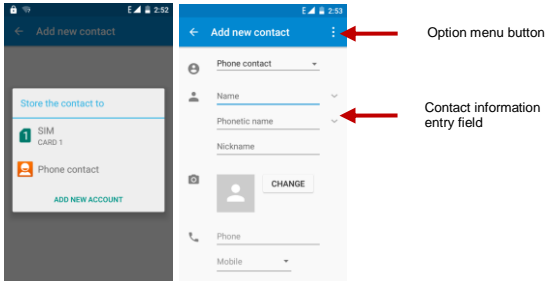

- Click the option icon and select Search to enter the contact search interface. Any numbers or letters associated with any of the contacts saved in the list will be shown in the search results.

Add New Contact

- Click the add contact icon (👤+) to add contact.
- Select to save your contacts to your Google account, the phone or the SIM card.

- You may enter different contact details which include adding a picture, name, telephone number, group, address, and email among other options.

Click to finish and save contact.

Delete Contact

- Click on the Contacts icon to enter the phonebook.
- Click the menu key to access the Contacts menu.
- Click on **Delete contact** and scroll to select which contact(s) you wish to delete.

Note: You may also search for an individual contact in the phonebook. Once the contact is found click the contact name

to enter the contact profile, press the menu key to bring up the contact menu and select delete to eliminate from the phonebook.

Import / Export Contacts

The phone allows you to import and export contacts to synchronize information between different storage types that include the SIM card, Gmail account and your phone.

To import or export contacts:

1. Press the Contacts icon to enter the phonebook.
2. Press the menu key and select **Import / Export**.
3. Select the source you want to copy the contacts from. Once selected click next and select the destination where you want the contact to be copied to then select the desired contacts to be copied.

Messaging

You may use this function to exchange text messages and multimedia messages with your family and friends. The messages to and from the same contact or phone number will

be saved into a single conversation so you may see the entire message history conveniently.

Send an SMS

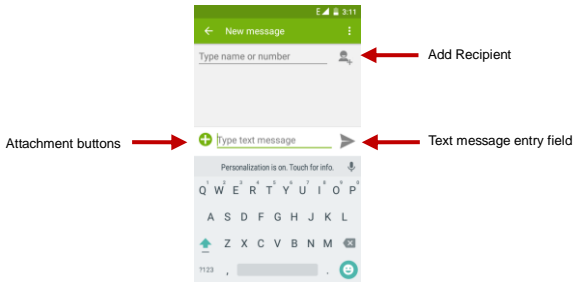

Application Menu » Messaging » New message icon()

- Click the contact icon to add text message recipient
- Compose Text Message and click Send

Send an MMS

When creating message, the default message style is SMS. The message will automatically convert to MMS when adding an attachment.

- Click the attachment icon () in the messaging interface.
- Click to add attachments and create an MMS message.

Bluetooth & Wi-Fi

Bluetooth is a short-range wireless communications technology that devices can use to exchange information and connect to different types of devices which include headsets and other devices.

Power on Bluetooth

Settings » Bluetooth and select to power on Bluetooth.

- The  icon will appear in the notification bar. The Bluetooth will then start to scan for all visible Bluetooth devices within its range and will display in a list.

- In Bluetooth settings, all the devices found will be displayed in a list.

List of available Bluetooth devices

Note: The maximum detecting time of the phone is 2 minutes.

Power on WI-Fi

Settings » WI-Fi and select ON to power on WI-Fi

- Click on the desired WI-Fi network to be connected.

Note: Unsecured networks can be connected to directly - secured networks require a password or credentials prior to connection.

List of available networks and the network connection screen

Downloads

The download section of the phone keeps sorted all of the files that have been downloaded on the phone. The section can display the download by date or by size. To clear the file from the list, long press on the file and then select the delete icon.

List of available downloads sorted by date

Internet Browser

Menu Functions

Backward

- Click the backward icon in the browser will return the user to the previous page.

Forward

- Click the forward icon in the browser will move to a web page after the current page.

Windows

- View all windows open by clicking the windows icon in the browser.

Bookmarks

- Click the **save to Bookmarks** option to save to Bookmarks.

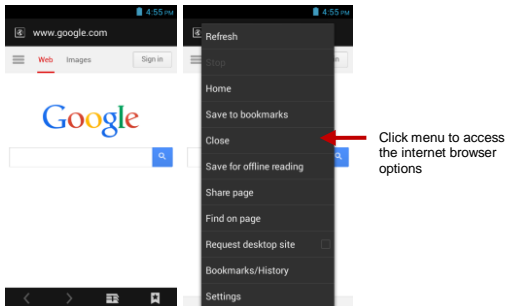

More

Find on page: Search current page.

Share page: Select to share the current page.

Bookmarks/History: Show your browsing history and view the most visited pages.

Settings: Contains a variety of browser settings.

Gmail

Gmail is Google's free email service. To access the Gmail program, click the applications menu and click on the Gmail icon and either sign in with your existing account or create a new one.

Note: *In order to keep accounts streamlined with Google services, your Gmail account user name and password will be used for some Google programs which include: Google Play Store, Google Drive, Google +, Google Photos, and Google*

Wallet.

The Gmail inbox is separated by default in three different categories.

These categories include primary inbox, social inbox where all your Facebook, Twitter, and social media emails are separated to and your Promotions inbox where all your commercial emails are separated.

You may add or delete other categories in Gmail settings

Play Store

Google Play allows you to download music, movies, and games directly to your device. To access the Google Play Store, click on the applications menu and then the Play Store icon.

Search and select between different Play Store categories

Camera

Prior to use: Insert SD card before using the camera or video camera. All photos or videos taken by the phone are typically stored in the memory card for large storage capacity of images and videos.

Open Camera

Printing

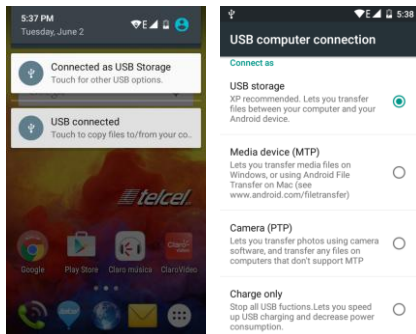

- Power on and off Cloud print. TO use Cloud print, you need to add a Google account to your device.

About Phone

- Phone information status and firmware updates.

Storage

Connect the phone with the USB cable provided. Once connected, a connection interface will appear. In the connection mode interface, select MTP and turn on from the connection screen to be able to transfer files. You may also select other storage options that are available.

FCC

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over on one gram of tissue.

Device types: Ilium L200 (FCCID: ZC4XL200) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 1.267 W/kg and when properly worn on the body is 1.344 W/kg. This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the

supplied or an approved antenna.

The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of

the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

The user's manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form
