Attention and Precautions

Please read these brief rules. Violation of these rules might cause danger or break laws.

1 Safety Precautions

1.1 Road safety comes first

When driving, care must be taken for using phone; if driving conditions are poor, please pull up at road side to use the phone.

1.2 Switch off your phone in hospitals

Please abide by relevant regulations or rules. Please switch off when close to medical equipment.

1.3 Switch off your phone in aircrafts

Wireless phones can cause interference. Using phones in aircraft is both dangerous and illegal.

1.4 Switch off your phone when refuelling

Do not use the phone at a refuelling station or near fuels or chemicals.

1.5 Switch off your phone when close to blasting area

To avoid interfering with blasting operations, turn your phone **OFF** when in a “blasting area” or in areas posted: “turn off twoway radio”. Obey all signs and instructions.

2 Precautions When Using Phone

2.1 Interference

All phones are subject to interference, which will affect their performance.

2.2 Use sensibly

Use phone only in its normal position. Please do not touch antenna area unless necessary.

2.3 Use qualified servicing

Only qualified maintenance staff can assemble or repair the equipment.

2.4 Waterproof

Your phone is not waterproof, please keep it dry.

2.5 Emergency calls

Make sure the phone is switched on and in service. Input emergency service number and press Dial key, give your location and do not end the call until told to do so.

3 Precautions When Using Batteries

3.1 Keep the batteries away from fire; do not dispose of batteries in a fire lest there should be danger.

3.2 Do not dispose of used batteries in rubbish, and they should be sent to designated recycling center.

4 Precautions for children

Keep the phone out of the reach of children, lest children treat it as toy and cause personal injury.

Description of keypad keys

Keys	Description
[Dial key]	Dial a phone number or answer an incoming call. When the phone is in standby state, press this key to show the SIM call history list of dialed calls.
[End key]	End a call. Hold down this key to turn on/off your mobile phone. In other cases, pressing this key will make the phone return to standby state.

[Camera key]	In idle screen, press this key can access Camera. In other idle, the function of this key as the left soft key.

Getting Started

1. Installing the SIM Card and the Battery

Ensure that the golden contact area on the SIM card is facing downward, and the beveled edge is properly aligned with the SIM card slot.

Warning: Make sure to switch off the phone before taking out SIM card, otherwise your SIM card might be damaged.

2. Removing the Battery and the SIM Card

Before removing the battery and the SIM card, ensure that your phone is powered off.

3. Charging Battery

While charging, the power supply indicator at phone's screen icon zone will flash in a rotation manner, if the phone is off while charging, a charging screen will still appear, indicating that the phone is recharging. If the phone is still being overused while the power supply is insufficient, the recharging indicator will appear on the screen after the recharging has started for a while.

When the power supply indicator at the screen's icon zone shows full and stops flashing, it means charging has completed. If it takes place when the phone is off, the screen will display charging-finished icon. The process generally takes about 2.5 hours. It is normal that the battery, the phone and the charger will become hot during the charging process.

Charging completing, disconnect the phone and the charger from the AC power supply.

Note: Battery must be charged in a well ventilated place with surrounding temperature at $-10^{\circ}\text{C}\sim+55^{\circ}\text{C}$, and it is imperative that a charger provided by manufacturer is used. Using unauthorized charger might cause danger, which also violates warranty terms prescribed by the manufacturer. If the charging temperature is too high or too low, the phone will automatically give warning and stop charging, so as to prevent damages to battery or dangers.

4. Inserting and removing memory card

- Switch off the phone; remove battery and other external power connection.
- Insert memory card into card slot as shown in the image.

5. Switch on/off phone

To switch on or switch off phone, please press and hold the *End* key. If you have switched on phone without inserting SIM card in the first place, the phone will prompt "Insert SIM card".

Then the screen will display the following prompts in sequential order:

Enter phone password – if you have set up phone lock password.

Enter PIN – if you have set up SIM card password.

Search – the phone will search till finding appropriate network connection.

6. Unlocking SIM card

To prevent illegal usage, PIN (Personal Identification Number) code is adopted to encrypt for protection of your SIM card. Selecting this option and if having set up PIN code protection, you have to enter PIN code each time you start it, unlocking SIM card to use the mobile phone.

Users can erase SIM card password; however, in this case SIM card cannot prevent illegal usage.

- Press and hold the *End key* to switch on the phone;
 - Enter PIN1 code, use Right soft key to delete input errors, Left soft key for "OK". For instance, if PIN1 setting is 1234, then enter the following input: ,1 2 3 4"OK"
- If there are three consecutive input errors, your SIM card will be locked up by the network, the phone will inquire PUK1 code.

Note: Your service provider will set up a standard PIN (4 to 8 digits) number for your SIM card, you should change it into your private password as soon as possible.

7. Unlocking phone

To prevent phone from being illegally used, you can set up mobile phone lock Password for protection. Selecting this option, you must input mobile phone lock password to unlocking it and make it normal. Users can switch off mobile phone lock, but illegal usage cannot be prevented for mobile phone in this case.

- Pressing the hang-up key continuously to start up mobile phone.
- Input mobile phone lock Password, Right soft key to delete input errors, Left soft key for "OK".

For instance, if mobile phone Password is set up as 0000, then input the following: 0 0 0 0 "OK".

If you forget mobile phone Password, you have to contact local authorized repair center, so as to unlock your mobile phone's Password.

8. Connecting to network

After SIM card is successfully unlocked, the phone will automatically search available network (with searching showing on the screen). Once the connection is made, the name of the service provider will be displayed on the top central part of the text and graphic area. At this time your phone has been connected to the service network.

Note: If the screen prompts "Emergency ", this means you have moved out of the normal network coverage (service range) or your card has not passed authentication, but you can still transmit emergency calls based on signal strength.

Basic Functions

1 Making a call

When the logo of service provider appears on the display screen, you can dial or receive calls. The info bar at the upper left corner of the display screen shows network signal strength (when there are 5 info bars the signal is at its strongest).

The call quality is very likely to be affected by obstructions; therefore movement in a small area can effectively improve call performance.

1.1 Making domestic calls

Enter phone number, then press Dial Key to make the call. If the user needs to change phone number, press "delete" back and delete numbers. Dialing animation will be displayed on the screen during dialing. Call state info will be shown on the screen after the called party ends the call

You can enter and dial domestic call following the order:

Area code Phone number Dial

1.2 Dialing extension number of fixed-line telephone

Some extension numbers of fixed-line telephone cannot be connected directly, you must dial

the switchboard phone number, then press P key to enter "P", then dial extension number. You can dial extension numbers of fixed-line telephone in the following order:
Area code Switchboard number P Extension number Dial Key

1.3 Dialing international calls

To make an international call, you may press + key to enter "+" for international long distance call, which will enable you to make a call from any country without knowing the local international access code (for instance, in China it is 86).

You can enter numbers in the following sequence to make an international call: + country code complete phone number Dial Key

After inputting prefix number, input the code and the complete phone number of the wanted country. The country code follows usual practice, such as Germany 49, UK 44, Sweden 46, etc.

Like making an international call, the "0" before city code number should be dropped.

For instance, if making a call to a service hotline from other countries to Shanghai, you should dial: +86 21 114 or 008621 114

1.4 Dialing phone numbers in the call records

Every phone number you have dialed or received will be stored in the list of phone call records. The latest dialed, received and missed numbers will be listed, according to their types, in the respective menu of dialed calls, received calls and missed calls. When call record list is full, the old numbers will automatically be deleted. To view the list, do the followings:

- In standby state press Dial key to view the record for all dial calls.
- All phone numbers in the list can be dialed directly by pressing the Dial key.
- When the list is displayed, press "OK" to read the details, then "options" to Save or Delete the number.

2 Emergency calls

As long as in the network service range (which can be confirmed by checking the signal strength bars on the top left corner of the screen), you can always call emergency service. If your network supplier does not provide roaming service in your area, the screen will display "Emergency", to inform you that only emergency call is permitted. If you are within the network service range, you can also make emergency calls even without the SIM card.

3 Answering a call

Simply press dialing key can answer an incoming call. If an earphone has been connected, use the button on the earphone to answer a call, and if it is not convenient for you to press it, set automatic answer as on, assuring that the earphone is plugged on, so as to make calls automatically answered while the phone rings or vibrates. If Any Key answer function is chosen, pressing any key(except End key,left soft key, TV key, can answer an incoming call.

4 Call records

Your phone can also store call records of the latest missed calls, received calls, dialed calls, the time of last call as well as total amount of received calls and total dialed calls for you.

5 Call options

In connected state, pressing "Mute" to mute the speaker,Under activated H-Free key condition, press right soft key to switch off speaker. Operation methods of call options are the same with that of Function menu.

This call options can only be viewed during call process, moreover, the functions of call

waiting, call holding, and conference calls need service support, please contact your service provider for details.

In the call options, you can make the following operations:

- Hold Single call

Make the current call hold.

- End Single call

End the current call.

- New call

Enter new dialing interface.

- Phonebook

Enter Phonebook menu.

- Call history

FCC Notice to User

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

SAR Information

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types LX5 (FCC ID:ZC4LX5) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.647 W/kg and when properly worn on the body is 0.805 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
