FOR YOUR SAFETY

For your safety and proper use of the mobile phone, please read the following guidelines carefully: Do not switch the mobile phone on when close to chemical factory, gas station or other explosive objects.

- During driving, please use headset for safety purpose; unless otherwise in emergency, always stop the car on roadside to have a call conversation.
- Because the use of the mobile phone can cause interference in the aircraft, never use the mobile phone in aircraft. The use of the mobile phone is dangerous and illegal; do switch off the mobile phone before boarding.
- Pay special attention to the use of the mobile phone near heart pacemaker, deaf-aid and some other medical equipment. Because the mobile phone can cause interference with them.
- None-original factory's accessories and parts will lose guarantee.
- Do not dismantle the mobile phone without permission. In case of failure, please contact the supplier as soon as possible.
- Do not plug the charger into the mobile phone and charge without battery. Always power off the mobile phone when taking out the battery; otherwise the memory of the phone may be damaged.
- When charging the mobile phone, always keep it in the place with good ventilation, heat sink and away from flammable and explosive objects.
- In order to avoid demagnetization, always keep the mobile phone away from magnetic objects such as CD, credit card etc.
- Ensure the mobile phone not to contact any liquid; once such case

occurs, remove the battery and contact the supplier immediately.

● Do not use the mobile phone in the environment at too high or too low temperature, never expose the mobile phone under strong sunshine or too wet environment. The suitable temperature for the phone and accessories is 0℃-40℃. The height to use the phone shall be less than 2,000m.

● Do not use liquid or wet cloth with strong cleanser to clean the mobile phone.

● This mobile phone has shooting, video and audio recording functions, which shall be used as per the related laws and regulations.

● Always keep the mobile phone out of children's reach. Do not throw or vibrate the mobile phone because violent treatment to the mobile phone may damage the inner circuits and precise structures.

● Please do not discard the waste battery into general household garbage. Please deal with the waste battery according to provisions where they are definitely made.

Warning: Company will not bear any responsibility for any incompliance with the above guidelines or improper use of the mobile phone. Our company keeps the right to make modifications to any of the content here in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the mobile phone. In such case, the latter shall govern.

UNDERSTANDING YOUR PHONE

Your device is a phone that encloses features, such as **Camera, Video Player, Audio Player, FM radio** etc.

Battery	900mAh
Dimensions	96*53*13.2mm
Weight	83g (with battery) 63g (w/o battery)
Standby Time*	144 hours
Maximum Talk Time*	450 minutes

● *The standby time and maximum talk time depend upon the network signals and settings.*

After sales service

You are kindly refer to the Warranty Card provided in the sales package box.

Charger and Adapter Safety

Charger and adapter are designed for indoor use only.

Battery Information and Care

o   Please dispose of your battery properly.

o   Do not disassemble or short-circuit the battery.

o   Keep the battery's metal contacts clean.

o   Recharge the battery after long periods of non-use to maximize battery life.

o   Battery life will vary due to usage patterns and environmental conditions.

o   The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal status. In this case, remove the battery from the phone, reinsert it, and turn the phone on.

General Notice

o   Using a damaged battery or placing a battery in your mouth may cause serious injury.

o   Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.

o   Talking on your phone for long period of time may reduce call quality due to heat generated during use.

o   When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.

o   Using the phone in proximity to receiving equipment (i.e. TV or Radio) may cause interference to the phone.

o   Do not immerse your phone in water. If this happens, remove the battery and take it to Authorized Service Center.

o   Do not paint your phone.

o   The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text messages, voice

messages, picture, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.

o   Do not turn your phone on or off when the phone is close to your ear.

RF Exposure Information and Statement

o   The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types T65 (FCC ID: ZC4T65) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.703 W/kg and when properly worn on the body is 0.761 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

o   This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

o   NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

- o NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- o - Reorient or relocate the receiving antenna.
- o - Increase the separation between the equipment and receiver.
- o -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- o -Consult the dealer or an experienced radio/TV technician for help

Phenomena	Possible Causes
Unable to switch on	1. Does the battery have power? 2. Is the battery placed correctly
SIM failed	1. The SIM card is dirty. Clean it. 2. Reinstall the SIM card. 3. The SIM card is damaged. Replace it.
Poor signals	Check the signal strength icon on the screen. If the icon contains 4 bars, it indicates the signal is the strongest; if below 1 bars, it indicates the signal is very poor.
Unable to dial out	1. Maybe you have set Hide My Caller ID but your network operator does not provide this service for you. 2. Strong interference exists around you. 3. Maybe you have activated the call restriction function. 4. Maybe you have activated Line 2 but your network operator does not provide this service for you.
Unable to charge the battery	1. The battery may discharge too much; so it cannot be charged until it is connected for certain time.

	2. Its performance has worsened.
Unable to register to the network	1. Too weak signals or strong interference. 2. SIM card installed properly? Bad contact or SIM card damaged? If the SIM card is broken, please contact the network operator to replace it.
Unable to access service menus.	Maybe the SIM card does not support service function.
Only part of the photo set as standby photo can be seen.	The size of the photo may be too big. The recommended size is 220*176
