RE: GSM Module for S320 GNSS Receiver & FCC ID: ZC8S320

To Whom It May Concern:

The GSM Module used in the S320 GNSS receiver is the GE865 from Telit. This is an off the shelf module that has been FCC certified. We have no control over the tune up circuit as we only attach an antenna that is internal in the S320 and a set value components for the matching circuit. Please refer to GE865 FCC filing (R17GE865) for information of the GSM Module and its tune up procedure.

Sincerely,

Abdulrahman M. Kassim
