Easy Set Up

Step 1 Download

- Go to the App Store or Google Play to search and download "Wansview Cloud" APP to your supported devices.
- Or please scan below QR code to download Wansview Cloud to your Android or Apple device.

Wansview Cloud APP icon

Step 2 Account Register

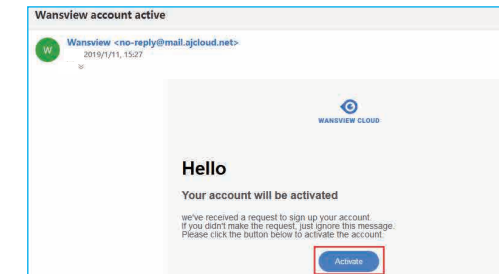

1 Open Wansview Cloud App, then select Sign up.

2 Enter your email.

3 Create a password at least 8 characters long. Your password must include three of the following:
• At least one uppercase letter. • At least one lowercase letter. • At least one number.

4 You will receive an email with your Activation Link. Open the link to activate your account.

5 Go back to login your account after activation successful.

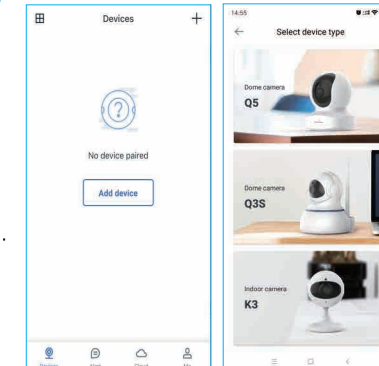

Step 3 Power on camera

- Power on the camera with the supplied power cord and put the camera near to router.

Step 4 Connect to network

(Wi-Fi connection process for Q5/K5 are the same. Here we take Q5 camera as example.)

- Connect your phone to 2.4G Wi-Fi (5G is not supported). Open the Wansview Cloud app. Please tap [Add device], and choose your camera model(Q5/K5).

- If you see the flashing blue and red light on the back of camera, please tap [Flashing]. If there is no blue light, please check FAQ .

- You'll see your Wi-Fi name, inputting the correct Wi-Fi password and tap [Next]. The app will show a QR code, please put the phone in front of camera about 3-8 inches, then please tap [Next] if you hear "QR code scanning is successful".

- During connecting, the blue light will flash quickly. Once it's connected, camera will say "WiFi is connected" and the blue light will flash slowly. When the blue light is steady, the App will switch to a page that you can change camera name. Now can enjoy the video from camera !

FAQ:

The camera can not connect to Wi-Fi ?

Please press the reset button on camera for 5 seconds until the red light flashes quickly and camera says "reset is successful".

Please wait for about one minute, then camera will flash blue and red light alternately and you can reconnect it now.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna. FCC ID: ZCB-K5

Manufacturer's Name: Shenzhen Smart-eye Digital Electronics Co., Ltd

Sample Description: IP Camera
Model number: K5 (708JBU) , Q5 (636JBU), W4 (757JBU) , W5 (758JA) , W6 (791JA) , 702JBU, 705JBU, 632JBU, 635JBU, 754JBU
Operating Temperature: - 10° C to 40° C

This product is a fixed location. To comply with RF exposure requirements, a minimum separation distance of 20cm must be maintained between the user's body and the device, including the antenna. Use only the supplied or an approved antenna. This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.
