The cords on this product are a potential strangulation hazard. For child safety, please keep these cords out of the reach of children.

3. Setting Up Your Camera: Connection via the Foscam App (Recommended)

■ Before You Get Started

Scan the QR code below to download and install the Foscam APP.

GET IT ON
Google Play

Available on the
App Store

To ensure a smoother video experience on your smart phone, it is recommended that your smart phone meet the following speciﬁcations:

● iOS: version 11 or higher.
● Android: 4.1 or higher, using a device with a Graphics Processing Unit (GPU).
Note: For the best experience, please update the APP to the latest version!

■ WiFi connection

1. Please tighten the antenna clockwise and make sure it is in a vertical position.
Tighten clockwise

2. Plug the power adapter into the camera, and please wait for a few seconds until hearing the "**Ready for WiFi conﬁguration**".

Reset

Tips: If you didn't hearthe voice prompt, press and hold reset for about 3~5 seconds to reset the camera.

3. Make sure that your smart phone is connected to your WiFi router.
WiFi

✓ 2.4 GHz
✓ 5 GHz

Tips: The camera supports dual-band 2.4GHz and 5GHz WiFi networks, so you can choose the channel with the stronger signal to use. For example, choose your SSID: XXXXX_2.4G or XXXXX_5G.
4. Open the Foscam APP and please sign up for a Foscam account, or sign in if you have one already.

---

5. Follow the steps below:

5. PC Access Your Camera

■ Foscam VMS

Foscam VMS is a new tool for PCs. It does not require plug-ins and is compatible with Windows & Mac, supporting all Foscam HD cameras and up to 36 cameras at the same time. If you would like to manage multiple cameras, we suggest you install Foscam VMS. You can download the "Foscam VMS "Windows version from **foscam.com/vms**, and can download the "Foscam VMS" Mac version from the APP store:

https://apps.apple.com/cn/app/foscamvms/id1521202507?mt=12
Note: For the best experience, please update Foscam VMS to the latest version!

Note: If the process of adding a camera fails, please reset your camera and try adding again according to the above method.

Reset

Add the IP Camera

1. Run Foscam VMS, then create a local administrator account or a Foscam account and login.
2. Tap the "+" icon on the Foscam VMS and follow the setup wizard to add your camera.

Please visit **foscam.com/downloads** to view the user manual and for additional detailed steps.
6. Important Notice

■ Camera Username & Password

The camera username & password are used to access and manage your camera. Having a strong password can signiicantly improve the security of your camera.

If you have forgotten either of them, please press the "Reset" button.

Press and hold the "Reset" button for 3-5 seconds until hearing "reset succeed".

Reset

■ Storage Media

Your camera supports cloud, NVR (Network Video Recorder), and Micro SD card (supports FAT32 and exFAT format) storage formats.

cloud Storage   NVR   Micro SD card (FAT32 & exFAT)

Warning

To assure continued compliance, any changes or modiications not expressly approved by the party.Responsible for compliance could void the user's authority to operate this equipment.

FCC Statement

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
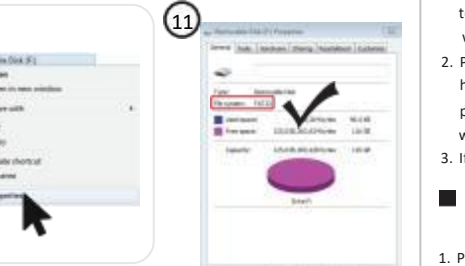

(1) This device may not cause harmful interference, and

---

(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the rules for white space devices, pursuant to part 15 of the FCC rules. These rules are designed to provide reasonable protection against harmful interference. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

(1) Reorient or relocate the receiving antenna.

(2) Increase the separation between the equipment and receiver.

(3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

(4) Consult the manufacturer, dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

---

7. Product Performance

WLAN frequency range: 2412MHz - 2472MHz and 5725MHz - 5850MHz

Maximum transmission power: < 19dBm

Wireless Standard: IEEE802.11b/g/n (2.4GHz)
IEEE802.11a/n/ac (5GHz)

Power Supply: DC 5V 1.5A 7.5W

8. Troubleshooting

■ IP cameras is not powering on

If you ind your camera is not powering on, please the following:

1. Please check whether the outlet is working properly or not. Try

---

to plug the camera into a diferent outlet and see whether it will work

2. Please check whether the DC adapter is working or not. If you have another 5V/1.5A power adapter which is working, please try with another power adapter and see whether it will work.

3. If it still won't work, please contact Foscam support.

■ How to re-configure the WiFi connection for Foscam cameras after router changed?

1. Please connect the camera to your router with an ethernet cable. If you can see the camera live video on the Foscam app, please go to camera settings-->WiFi settings to choose the new WiFi name and input WiFi password to set up. After the WiFi settings is completed, please disconnect the ethernet cable from the camera and wait for some seconds to connect to the camera.

2. There is a need to reset the camera irst. Please refer to https://www.foscam.com/faqs/view.html?id=13 to see the reset steps.
Then please open the Foscam app to scan the QR-code of your camera to set up the wireless connection for the camera. Please make sure your cellphone is connected to that new WiFi.
