RE: FCC Certification
FCC ID: ZDLST3

To Whom It May Concern:

The module tested and certified under FCC ID XPY1CGM5NNN is incorporated in the Buddi SmartTag Location device (FCC ID ZDLST3) and is not modified in any way. The only reason for the re-certification is due to the module being used outside of the grant conditions as it is used within 20cm of human body.

On this submission we are filling original module test reports that still accurately represent conducted test results under the new conditions described above. The original test reports are identified as: 16-1-0019501T07a, 16-1-0010501T07a, TRA16-1-0019501T05a and are only used and valid for conducted test results.

On this submission we are also filling additional new test evidence for radiated results and RF exposure to demonstrate full compliance of both module integrated into the host and the host itself.

Thank you for your attention to this matter.

Yours faithfully
