Operation description

The power from iPod supply for EUT   Audio signal is produced from FM Transmitter chip by internal IC dimensional sound of modulate circuit, phase-locked loop and a high frequency oscillating circuit.

  1. Press the button and through MCU control PLL to set the frequency
  2. Range of FM frequency: 88.1MHz to 109.7MHz
  3. 7.6MHz crystal
  4. Antenna is printing antenna
