**Re: Request for Long-Term Confidential Treatment for Class II Permissive Change to Equipment Authorization Under FCC ID No. ZHS-1013**

To Whom It May Concern:

Pursuant to the provisions of Sections 0.457 and 0.459 of the Commission's rules (47 CFR §§ 0.457, 0.459), Dodds LLC and its affiliated companies ("Dodds") request that the application for the Class II permissive change for equipment authorization under FCC ID No. ZHS-1013 and the exhibit listed below be withheld from public disclosure indefinitely:

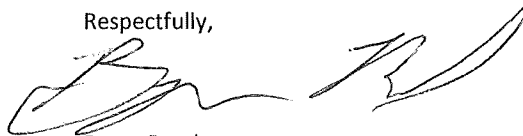

- WiFi RF Operation Description (the "Confidential Materials").

Dodds requests confidential treatment indefinitely for the Class II permissive change for the equipment authorization under FCC ID No. ZHS-1013.

Confidential Materials identified above have been separated from the non-confidential portions of the application, and they contain highly confidential and proprietary information, including circuit diagrams and other key product and technical details normally kept confidential by Dodds. Such information is used in designing and manufacturing radio communications equipment used by consumers in commercial mobile radio services equipment. This is a highly competitive field. Competitors would: (i) gain unfair insight into Dodds' product development and manufacturing processes; (ii) have an advantage that would not be available to Dodds; and profit from the work of Dodds' research and development efforts. Dodds keeps the Confidential Materials confidential and has only disclosed such information to those required to maintain its confidentiality. Dodds has not publicly disclosed the Confidential Materials.

Dodds is seeking indefinite confidential treatment because the Confidential Materials are not customarily disclosed to the public even after commercial release of the product. The disclosure of the Confidential Materials, including design and technical information, will give competitors insight into Dodds' proprietary processes and techniques. Therefore, it is important that the Confidential Materials not be made available to unauthorized persons so as not to provide such persons an unfair market advantage.

Respectfully,
