Compliance list INTEGRATION INSTRUCTIONS for 996369 D03 OEM the and 996369 D03 OEM by Sections 2.2 through 2.10.

Requirement	Yes	N/A	Comment
2.2 List of applicable FCC rules	YES	,,,	Refer to instruction
List the FCC rules that are applicable to the	123		Nerel to motivation
modular transmitter. These are the rules that			FCC standards: FCC CFR Title 47 Part 15
specifically establish the bands of operation,			Subpart C Section 15.247
the power, spurious emissions, and operating			Suspant Section 13/2 17
fundamental frequencies. DO NOT list			
compliance to unintentional-radiator rules			
(Part 15 Subpart B) since that is not a			
condition of a module grant that is extended			
to a host manufacturer. See also Section 2.10			
below concerning the need to notify host			
manufacturers that further testing is			
required.3			
2.3 Summarize the specific operational use	YES		Refer to instruction
conditions	11.3		Integral antenna:
Describe use conditions that are applicable to			Model: ATW-102-0009-010
the modular transmitter, including for			
example any limits on antennas, etc. For			Manufacturer: Ante intelligent
example, if point-to-point antennas are used			Communications(shenzhen)CO.,Ltd
that require reduction in power or			Antenna gain: 1.5dBi
compensation for cable loss, then this			External antenna:
information must be in the instructions. If the			Model: AN2400-5701SM
use condition limitations extend to			Manufacturer: Dongguan meimei
professional users, then instructions must			electronics factory Antenna gain: 2dBi
state that this information also extends to the			Integral antenna:
host manufacturer's instruction manual. In			Model: NB004-113B-125IX
addition, certain information may also be			Manufacturer: Dongguan honuo
needed, such as peak gain per frequency band			electronics co. LTD Antenna gain: 2dBi
and minimum gain, specifically for master			
devices in 5 GHz DFS bands.			
2.4 Limited module procedures		N/A	Not applicable
If a modular transmitter is approved as a		IN/A	Not applicable
"limited module," then the module			
manufacturer is responsible for approving the			
host environment that the limited module is			
used with. The manufacturer of a limited			
module must describe, both in the filing and in			
the installation instructions, the alternative			
means that the limited module manufacturer			
uses to verify that the host meets the necessary			
requirements to satisfy the module limiting			
conditions.			
A limited module manufacturer has the			
flexibility to define its alternative method to			
address the conditions that limit the initial			
approval, such as: shielding, minimum			

signaling amplitude, buffered modulation/data inputs, or power supply regulation. The alternative method could include that the limited module manufacturer reviews detailed test data or host designs prior to giving the host manufacturer approval. This limited module procedure is also applicable for RF exposure evaluation when it is necessary to demonstrate compliance in a specific host. The module manufacturer must state how control of the product into which the modular transmitter will be installed will be maintained such that full compliance of the product is always ensured. For additional hosts other than the specific host originally granted with a limited module, a Class II permissive change is required on the module grant to register the additional host as a specific host also approved with the module.		
2.5 Trace antenna designs For a modular transmitter with trace antenna designs, see the guidance in Question 11 of KDB Publication 996369 D02 FAQ – Modules for Micro-Strip Antennas and traces. The integration information shall include for the TCB review the integration instructions for the following aspects: layout of trace design, parts list (BOM), antenna, connectors, and isolation requirements.4	N/A	Not applicable
a) Information that includes permitted variances (e.g., trace boundary limits, thickness, length, width, shape(s), dielectric constant, and impedance as applicable for each type of antenna);		
b) Each design shall be considered a different type (e.g., antenna length in multiple(s) of frequency, the wavelength, and antenna shape (traces in phase) can affect antenna gain and must be considered);		
c) The parameters shall be provided in a manner permitting host manufacturers to design the printed circuit (PC) board layout;		
d) Appropriate parts by manufacturer and specifications;		
e) Test procedures for design verification; and		

	, 	
f) Production test procedures for		
ensuring compliance.		
The module grantee shall provide a notice that any deviation(s) from the defined parameters of the antenna trace, as described by the instructions, require that the host product manufacturer must notify the module grantee that they wish to change the antenna trace design. In this case, a Class II permissive change application is required to be filed by the grantee, or the host manufacturer can		
take responsibility through the change in FCC		
ID (new application) procedure followed by a		
Class II permissive change application.		
2.6 RF exposure considerations	YES	Refer to instruction
It is essential for module grantees to clearly		
and explicitly state the RF exposure conditions		The modular can be installed or integrated
that permit a host product manufacturer to		in mobile or fix devices only. This modular
use the module. Two types of instructions are		cannot be installed in any portable device.
required for RF exposure information: (1) to		This modular complies with FCC RF
the host product manufacturer, to define the		radiation exposure limits set forth for an
application conditions (mobile, portable – xx		uncontrolled environment. This transmitter
cm from a person's body); and (2) additional		must not be co-located or operating in
text needed for the host product		conjunction with any other antenna or
manufacturer to provide to end users in their		transmitter. This modular must be installed
end-product manuals. If RF exposure		and operated with a minimum distance of
statements and use conditions are not		20 cm between the radiator and user body.
provided, then the host product manufacturer		
is required to take responsibility of the		
module through a change in FCC ID (new		
application).	VEC	Defends to the disc
2.7 Antennas A list of entennas included in the application	YES	Refer to instruction
A list of antennas included in the application for certification must be provided in the		Integral antenna:
instructions. For modular transmitters		Model: ATW-102-0009-010
approved as limited modules, all applicable		Manufacturer: Ante intelligent
professional installer instructions must be		Communications(shenzhen)CO.,Ltd
included as part of the information to the host		Antenna gain: 1.5dBi
product manufacturer. The antenna list shall		External antenna:
also identify the antenna types (monopole,		Model: AN2400-5701SM
PIFA, dipole, etc. (note that for example an		Manufacturer: Dongguan meimei
"omni-directional antenna" is not considered to		electronics factory Antenna gain: 2dBi
be a specific "antenna type")).		Integral antenna:
For situations where the host product manufacturer is responsible for an external		Model: NB004-113B-125IX
connector, for example with an RF pin and		Manufacturer: Dongguan honuo
antenna trace design, the integration		electronics co. LTD Antenna gain: 2dBi
	<u> </u>	1

instructions shall inform the installer that		
unique antenna connector must be used on the		
Part 15 authorized transmitters used in the host		
product. The module manufacturers shall		
provide a list of acceptable unique connectors.		
2.8 Label and compliance information	YES	Refer to instruction
Grantees are responsible for the continued		If the FCC identification number is not
compliance of their modules to the FCC rules.		visible when the module is installed inside
This includes advising host product		another device, then the outside of the
manufacturers that they need to provide a		device into which the module is installed
physical or e-label stating "Contains FCC ID"		must also display a label referring to the
with their finished product. See Guidelines for		enclosed module. This exterior label can
Labeling and User Information for RF Devices –		use wording such as the following:
KDB Publication 784748.		"Contains Transmitter Module FCC ID:
NDB Publication 764746.		
		ZHZHE Or Contains FCC ID: ZHZHE "
2.9 Information on test modes and additional	YES	
testing requirements		Refer to instruction
Additional guidance for testing host products is		Any company of the host device which
given in KDB Publication 996369 D04 Module		install this modular with limit modular
Integration Guide. Test modes should take into		approval should perform the test of
consideration different operational conditions		radiated & conducted emission and

The state of the s	<u> </u>	

for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. If the grantee markets their product as being Part 15 Subpart B compliant (when it also contains unintentional-radiator digital circuity), then the grantee shall provide a notice stating that the final host product still requires Part 15 Subpart B compliance testing with the modular transmitter installed.6

When the module is installed inside another device, the user manual of the host must contain below warning statements;

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more

- of the following measures:

 —Reorient or relocate the receiving antenna.
- —Increase the separation between the equipment and receiver.
- —Connect the equipment into an outlet on a circuit different from that to
- which the receiver is connected.
- —Consult the dealer or an experienced radio/TV technician for help.
