## Introduction

The Jenkins J5 Portable Wireless Speaker is a Bluetooth enabled sound system supporting stereo music, and hands-free call answering. In addition it is equipped with digital signal processing technology, and an echo and noise removal feature. Ideal for use in the home and office, the J5 works with Smartphone's, tablets and other Bluetooth devices. The portable speaker comes with a built-in lithium battery touch panel button and can be recharged via a USB connection. The J5 also includes an AUX Input for standard MP3 or other audio device connection.

## Precautions

First thanks for buying the digital sound system produced by this company!

Please refer the User's Instructions before using it properly. The contents stated herein may be modified from time to time for better service as the product properties and functions are changed and this company will not notify you otherwise.

For the sound performances of the product, never use it in too cold, too hot, too dusty or humid places, especially:

1. Moist or underwater places
2. Near the heater or hi-temperature service
3. Polarization
4. Places apt to fall
5. Never disassemble the combination audio

Otherwise, it may invalidate the warranty

## Warning:

1. Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
2. Where the mains plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
