Instructions

1. Plug the transmitter into your iPod® or iPhone®. When the transmitter is powered on, it displays the default screen interface shown below:

2. Play music on your iPod® or iPhone®.
3. To manually tune:
 - a. Tune the car's FM stereo to a clear frequency.
 - b. Tune the transmitter to the same frequency by using the down (<) or up (>) buttons.
4. To automatically scan for the best clear frequency:
 - a. Press the AUTO SCAN button.
 - b. Tune the car's FM stereo to the same frequency.
5. To automatically store the three best frequencies in memory, press the AUTO SCAN button down for three seconds. The transmitter displays the three best frequencies and automatically saves them to memory.

If you do not press one of the memory buttons (M1, M2, M3) within five seconds, the transmitter automatically tunes to the first one and then displays the default screen.

6. To tune to a frequency in memory:
 - a. Press the MENU button. The display shows the three stored frequencies above the three buttons. If there are no present frequencies, the transmitter displays the default screen.
 - b. Press the M1, M2, or M3 button.
 - c. Tune the car's stereo to the same frequency.
7. To control your iPod® or iPhone® from the transmitter's display, press the MENU button twice. The transmitter's display shows the iPod® controls above the three buttons: Previous, Pause/Play next.

The iPod® control interface remains on screen until you press the MENU button.
