Introductie / Въведение / Introducere:

NL De draadloze stereo Bluetooth koptelefoon BBH100 kan gebruikt worden als handenvrije audio koptelefoon en voor stereofone muziek. Uitgerust met de draadloze technologie Bluetooth 2.1+EDR, is hij compatibel met alle Bluetooth toestellen die de profielen HFP en A2DP ondersteunen en kan hij ook functioneren voor uitzendingen Dual Air TM (de compatibiliteit controleren op de site www.bee-wi.com).

BU Безжичните стерео слушалки с Bluetooth BBH100 могат да се използват като аудио-слушалки тип „свободни ръце“, както и като стереофонични слушалки за слушане на музика. Снабдени с безжичната технология Bluetooth 2.1+EDR, слушалките са съвместими с повечето уреди с Bluetooth, поддържащи профили HFP и A2DP и могат да работят и при разпространение Dual Air TM (проверете съвместимостта в сайта www.bee-wi.com).

RO Căștile stereo fără fir Bluetooth BBH100 pot fi utilizate ca și căști audio mâini libere și ca difuzoare stereo pentru muzică. Echipate cu tehnologia fără fir Bluetooth 2.1+EDR, acestea sunt compatibile cu toate aparatele Bluetooth care acceptă profilurile HFP și A2DP și pot funcționa și în modul de difuzare Dual Air TM (verificați compatibilitatea pe site-ul www.bee-wi.com).
