Indicator icons on the Status Bar

Indicator icons appear on the status bar at the top of the screen to report missed calls, new messages, calendar events, device status and more.

The icons displayed at the top of the screen provide information about the status of the device. The icons listed in the table below are some of the most common ones.

Icon	Description	Icon	Description
📇	No USIM card	📳	Vibrate mode
📶	No signal	💯	Battery fully charged
✈	Airplane mode	🔋	Battery is charging
📶	Connected to a Wi-Fi network	⬇	Downloading data
🎧	Wired headset	⬆	Uploading data
📞	Call in progress	◯	GPS is acquiring
📞	Call hold	◉	Receiving location data from GPS
📢	Speakerphone	🔄	Data is syncing
📵	Missed call	Ⓜ	New Gmail
🅱	Bluetooth is on	💬	New message
⚠	System warning	▶	Song is playing

🕐	Alarm is set	🔱	Phone is connected to PC via USB cable or USB tethering is active
🔘	New voicemail	🔊	Portable Wi-Fi hotspot is active
🔇	Ringer is silenced	🔘	Both USB tethering and portable hotspot are active

NOTE: The icon's location in the status bar may differ according to the function or service.

Onscreen keyboard

You can enter text using the on-screen keyboard. The on-screen keyboard appears automatically on the screen when you need to enter text. To manually display the keyboard, simply touch a text field where you want to enter text.

Using the keypad & entering text

⇧ Tap once to capitalize the next letter you type. Double-tap for all caps.

123? abc Tap to switch to the numbers and symbols keyboard.

⎵ Tap to enter a space.

⏎ Tap to create a new line.

⌫ Tap to delete the previous character.

Entering accented letters

When you select French or Spanish as the text entry language, you can enter special French or Spanish characters (e.g. "á").

For example, to input "á", touch and hold the "a" key until the zoom-in key grows bigger and displays characters from different languages.

Then select the special character you want.

Google account setup

When you first turn on your phone, you have the opportunity to activate the network, to sign into your Google Account and select how you want to use certain Google services.

To set up your Google account:

- Sign into a Google Account from the prompted set-up screen.
  OR
- Touch ![apps] > **Apps** tab > select a Google application, such as **Gmail** > select **New** to create a new account.

If you have a Google account, touch **Existing**, enter your email address and password, then touch ![arrow].

Once you have set up your Google account on your phone, your phone automatically synchronizes with your Google account on the Web.

Your contacts, Gmail messages, Calendar events and other information from these applications and services on the Web are synchronized with your phone. (This will depend on your synchronization settings.)

After signing in, you can use Gmail™ and take advantage of Google services on your phone.

Connecting to Networks and Devices

Wi-Fi

With Wi-Fi, you can use high-speed Internet access within the coverage of the wireless access point (AP). Enjoy wireless Internet using Wi-Fi, without extra charges.

Connecting to Wi-Fi networks

To use Wi-Fi on your phone, you need to access a wireless access point or 'hotspot'. Some access points are open and you can simply connect to them. Others are hidden or use security features, you must configure your phone to be able to connect to them. Turn off Wi-Fi when you're not using it to extend the life of your battery.

> **NOTE:** If you are out of the Wi-Fi zone or have set Wi-Fi to **OFF**, additional charges may be applied by your mobile operator for mobile data use.

Turning Wi-Fi on and connecting to a Wi-Fi network

1 Touch 🔲 > **Apps** tab > **Settings** > **Wi-Fi** from the WIRELESS & NETWORKS tab.
2 Set **Wi-Fi** to **ON** and start scanning for available Wi-Fi networks.
3 Tap the Wi-Fi menu again to see a list of active and in-range Wi-Fi networks.
   • Secured networks are indicated by a lock icon.
4 Touch a network to connect to it.
   • If the network is secured, you are prompted to enter a password or other credentials. (Ask your network administrator for details)
5 The status bar displays icons that indicate Wi-Fi status.

Bluetooth

You can use Bluetooth to send data by running a corresponding application, not from the Bluetooth menu as on most other mobile phones.

NOTE:
- LG is not responsible for the loss, interception or misuse of data sent or received via the Bluetooth wireless feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by Bluetooth SIG, may be incompatible with your device.

Turning on Bluetooth and pairing up your phone with a Bluetooth device
You must pair your device with another device before you connect to it.
1 Touch ▦ > **Apps** tab > **Settings** > set **Bluetooth** to **ON** from the WIRELESS & NETWORKS tab.
2 Tap the **Bluetooth** menu again. You will see the option to make your phone visible and option to search devices. Now tap **Search for devices** to view the devices in the Bluetooth Range.
3 Choose the device you want to pair with from the list.
Once the paring is successful, your device will connect to the other device.

NOTE: Some devices, especially headsets or hands-free car kits, may have a fixed Bluetooth PIN, such as 0000. If the other device has a PIN, you will be asked to enter it.

Send data using the Bluetooth wireless feature
1 Select a file or item, such as a contact, calendar event or media file from an appropriate application or from **Downloads**.
2 Select the option for sending data via Bluetooth.

NOTE: The method for selecting an option may vary by data type.

3 Search for and pair with a Bluetooth-enabled device.

Receive data using the Bluetooth wireless feature
1 Touch ▦ > **Apps** tab > **Settings** > set **Bluetooth** to ON ◯◯ and touch **Make phone visible** to be visible on other devices.

NOTE: To select the length of time that your device will be visible, touch ⬛ > **Visibility timeout**.

2 Select **Accept** to confirm that you are willing to receive data from the device.

Sharing your phone's data connection

USB tethering and portable Wi-Fi hotspot are great features when there are no wireless connections available. You can share your phone's mobile data connection with a single computer via a USB cable (USB tethering). You can also share your phone's data connection with more than one device at a time by turning your phone into a portable Wi-Fi hotspot.

When your phone is sharing its data connection, an icon appears in the status bar and as an ongoing notification in the notifications drawer.

For the latest information about tethering and portable hotspots, including supported operating systems and other details, visit http://www.android.com/tether.

To change Portable Wi-Fi hotspot settings:
1 Touch ▦ > **Apps** tab > **Settings** > **More...** from the WIRELESS & NETWORKS tab > **Portable Wi-Fi hotspot** > choose options that you want to adjust.

TIP! If your computer is running Windows 7 or a recent distribution of some flavours of Linux (such as Ubuntu), you will not usually need to prepare your computer for tethering. But, if you are running an earlier version of Windows or another operating system, you may need to prepare your computer to establish a network connection via USB. For the most current information about which operating systems support USB tethering and how to configure them, visit http://www.android.com/tether.

To rename or secure your portable hotspot

You can change the name of your phone's Wi-Fi network name (SSID) and secure its Wi-Fi network.

1 On the Home screen, touch 📱 > **Apps** tab > **Settings.**
2 Touch **More...** from the WIRELESS & NETWORKS tab and select **Portable Wi-Fi hotspot**.
3 Ensure that **Portable Wi-Fi hotspot** is checked.
4 Touch **Set up Wi-Fi hotspot**.
   • The **Set up Wi-Fi hotspot** dialogue box will open.
   • You can change the **Network SSID** (name) that other computers see when scanning for Wi-Fi networks.
   • You can also touch the **Security** menu to configure the network with Wi-Fi Protected Access 2 (WPA2) security using a pre-shared key (PSK).
   • If you touch the **WPA2 PSK** security option, a password field is added to the **Set up Wi-Fi hotspot** dialogue box. If you enter a password, you will need to enter that password when you connect to the phone's hotspot with a computer or other device. You can set **Open** in the **Security** menu to remove security from your Wi-Fi network.
5 Touch **Save**.

ATTENTION! If you set the security option as Open, you cannot prevent unauthorised usage of online services by other people and additional charges may be incurred. To avoid unauthorized usage, you are advised to keep the security option active.

PC connections with a USB cable

Learn to connect your device to a PC with a USB cable in USB connection modes. By connecting the device to a PC you can directly transfer data to and from your device and use the PC software (LG PC Suite).

Syncing your phone with your computer

To synchronize your phone with your PC using the USB cable, you need to install the PC software (LG PC Suite) on your PC. Download the program from the LG website (www.lg.com).

1 Use the USB data cable to connect your phone to the PC. The USB connection type list will appear; select the LG software.

2 Run the LG PC Suite program on your PC. Refer to the PC software (LG PC Suite) help for more information.

NOTE: The LG integrated USB driver is required to connect an LG device to a PC. It is installed automatically when you install the LG PC Suite software.

Transferring music, photos and videos using the USB mass storage mode

1 Connect the your phone to a PC using a USB cable.

2 If you haven't installed the LG Android Platform Driver on your PC, you will need to manually change the settings. Touch ▦ > **Apps** tab > **Settings**> **PC connection** > **USB Connection type,** then select **Media sync (MTP).**

3 You can now view the mass storage content on your PC and transfer the files.

Synchronise with Windows Media Player

Ensure that Windows Media Player is installed on your PC.

1 Use the USB cable to connect the phone to a PC on which Windows Media Player has been installed.
2 Select the **Media sync (MTP)** option. When connected, a pop-up window will appear on the PC.
3 Open Windows Media Player to synchronize music files.
4 Edit or enter your device's name in the pop-up window (if necessary).
5 Select and drag the music files you want to the sync list.
6 Start synchronization.
• The following requirements must be satisfied to synchronize with Windows Media Player.

Items	Requirement
OS	Microsoft Windows XP SP2, Vista or higher
Window Media Player version	Windows Media Player 10 or higher

• If the Windows Media Player version is lower than 10, install version 10 or higher.

Calls

Making a call

1 Touch to open the keypad.
2 Enter the number using the keypad. To delete a digit, touch the .
3 Touch to make a call.
4 To end a call, touch the **End** icon .

TIP! To enter "+" to make international calls, touch and hold $\boxed{0+}$.

Calling your contacts

1 Touch to open your contacts.
2 Scroll through the contact list or enter the first few letters of the contact you want to call by touching **Search contacts**.
3 In the list, touch to make the call.

Answering and rejecting a call

When you receive a call in Lock state, swipe the in any direction to Answer the incoming call. When the screen is unlocked, you just need to touch the icon to answer.
Swipe the in any direction to Decline an incoming call.
Hold and slide the **Decline with message** icon from the bottom if you want to send a message.

TIP! Decline with message
You can send a message quickly using this function. This is useful if you need to reject a call with message during a meeting.

Adjusting the in-call volume

To adjust the in-call volume during a call, use the Volume up and down keys on the left-hand side of the phone.

Making a second call

1 During your first call, touch **Menu** key > **Add call** and dial the number. You can also go to the recently dialled numbers list by touching ![icon] or can search contacts by touching ![icon] and select the contact you want to call.
2 Touch ![icon] to make the call.
3 Both calls are displayed on the call screen. Your initial call is locked and put on hold.
4 Touch the displayed number to toggle between calls. Or touch ![icon] **Merge calls** to start a conference call.
5 To end active calls, touch **End** or press the **Home** key, and slide the notification bar down and select the **End call** icon ![icon].
NOTE: You are charged for each call you make.

Viewing your call logs

On the Home screen, touch ![icon] and choose the **Call logs** tab ![icon].
View a complete list of all dialled, received and missed calls.

TIP! Touch any call log entry to view the date, time and duration of the call.

TIP! Touch the **Menu** key ![icon], then touch **Delete all** to delete all the recorded items.

Calls

Call settings

You can configure phone call settings such as call forwarding, as well as other special features offered by your carrier.

1 On the Home screen, touch 📞.
2 Touch ≡.
3 Tap **Call settings** and choose the options that you wish to adjust.

Contacts

Add contacts to your phone and synchronize them with the contacts in your Google account or other accounts that support contact syncing.

Searching for a contact

On the Home screen

1 Touch 🔲 to open your contacts.

2 Touch **Search contacts** and enter the contact name using the keyboard.

Adding a new contact

1 Touch 📞, enter the new contact's number, then touch the **Menu** key ▭. Touch **Add to Contacts** > **Create new contact**.

2 If you want to add a picture to the new contact, touch the image area. Choose from **Take photo** or **Select from Gallery**.

3 Select the contact type by touching ◢.

4 Touch a category of contact information and enter the details about your contact.

5 Touch **Save**.

Favorite contacts

You can classify frequently called contacts as favorites.

Adding a contact to your favorites

1 Touch 🔲 to open your contacts.

2 Touch a contact to view its details.

3 Touch the star to the right corner of the contact's name. The star will turn to yellow color.

Contacts

Removing a contact from your favorites list

1 Touch 👤 to open your contacts.

2 Touch the ⭐ tab, and choose a contact to view its details.

3 Touch the yellow color star to the right corner of the contact's name. The star turns to grey color and the contact is removed from your favorites.

Creating a group

1 Touch 👤 to open your contacts.

2 Touch **Groups** and touch the **Menu** key 🔲. Select **New group**.

3 Enter a name for the new group.You can also set a ringtone for the newly created group.

4 Touch **Save** to save the group.

NOTE: If you delete a group, the contacts assigned to that group will not be lost. They will remain in your contacts.

Messaging

Your phone combines SMS and MMS into one intuitive, easy-to-use menu.

Sending a message

1 Touch 😊 on the Home screen and touch 📝 to open a blank message.
2 Enter a contact name or contact number in the **To** field. As you enter the contact name, matching contacts will appear. You can touch a suggested recipient. You can add more than one contact.

NOTE: You will be charged for a text message for every person you send the message to.

3 Touch the **Enter message** field and begin composing your message.
4 Touch 🔲 to open the Options menu. Choose from **Quick message, Insert smiley, Schedule sending, Add subject** and **Discard.**

TIP! You can touch the 📎 icon to attach the file you want to share to your message.

5 Touch **Send** to send your message.
6 Responses will appear on the screen. As you view and send additional messages, a message thread is created.

⚠️ **WARNING:** The 160-character limit may vary from country to country, depending on the language and how the SMS is coded.

⚠️ **WARNING:** If an image, video or audio file is added to an SMS message, it is automatically converted into an MMS message and you are charged accordingly.

Messaging

Threaded box

Unread messages (SMS, MMS) are located on the top. And the others exchanged with another party can be displayed in chronological order so that you can conveniently see an overview of your conversation.

Changing your message settings

Your phone message settings are pre-defined, so you can send messages immediately. You can change the settings according to your preferences.

• Touch the **Messaging** icon on the Home screen, touch ▭ and then tap **Settings**.
