## Statement on Tune-Up of easyAtoN

To whom it may concern,

We, Weatherdock AG declare, that our product easyAtoN (AIS Aids-to-Navigation) does not need any tune-up facilities in production to match the required performance standard IEC 62320-2 (AtoN). The easyAtoN incorporates a TCXO (temperature stabilized crystal oscillator) driving a Synthesizer-PLL to fulfil the requirements on frequency and modulation accuracy within the 25 kHz channels withing the maritime band.
