## Smart LED Bulb

**USER MANUAL**

## WARNING

- Not for emergency lighting
- Risk of electric shock
- Risk of fire
- Risk of burns
- Do not use where directly exposed to water
- Not for use in totally enclosed luminaries
- Do not use with medical and life-support instruments

**DO NOT USE WITH STANDARD DIMMERS**

### Installation Step

Follow the available instructions and resources to set up your smart device.

#### Step 1: Download the app

Download the Joinin Home APP from App Store or Google Play.

**Scan the QR code to download**

#### Step 2: Set up account

Create an account in Joinin Home App.

#### Step 3: Install the smart device

① Screw the smart bulb into a standard indoor light fixture.

② Power switch for the lamp or light fixture must be ON.

#### Step 4: Light pairing modes

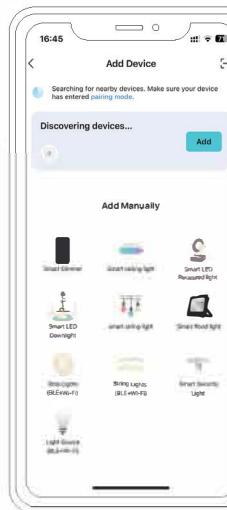

- Remove power to bulb (turn off light switch) for 1 sec, add power for 1 sec.(turn on lightswitch).
- Cycle five times. Bulb will be in ON position and begins flashing quickly.

#### Step 5: Add Device

1. Click Add Device or the + at the upper right corner.

2. System will auto scan the smart device.

### Connect to Wifi

3. Make sure your wifi is 2.4G.

4. Done. Enjoy your time with APP control.

### Voice control

Compatible with Amazon Alexa and Google Assistant

Follow the steps in the Amazon Alexa or Google Home app to connect the Joinin Home app or select "Third-Party Voice Services" in the Joinin Home app.

### Product Parameter

Rated Voltage	120V AC
Frequency	60Hz
Rated Power	7W (60W Equivalent)
Color Temperature	2700K
Luminous Flux	800LM
CRI	80
Rated Life	15000H
Socket Type	E26
Working Temperature	-20°C~40°C

### Troubleshooting ways

#### ★ Cannot connect to your wi-fi network.

- Please make sure your Wi-Fi router is under the 2.4GHz setting and the entered router password is correct.
- If Wi-Fi signal is too weak, reset your Wi-Fi router and try again.
- Please enable the Joinin Home App to get your local location and Bluetooth.

#### ★ Setup is not working properly.

- Clean all apps that are running in the background then reopen the Joinin Home App.
- Uninstall and reinstall the Joinin Home App then repeat the setup process.

#### ★ The bulb is not responding to Joinin Home App.

- Delete the original connection record in the app and repeat the connection processes.
- Check if the bulb is turned off. If yes, turn it on and wait until the bulb reconnects with the Wi-Fi network automatically.
- Check if there are problems with your internet connection. If necessary, reset your Wi-Fi router and try again.

#### ★ Home network is 5GHz.

The wall penetration capability of 5.0GHz is weaker than 2.4GHz which means that the outdoor signal of 5.0GHz is worse 2.4GHz. Therefore, most smart devices support 2.4GHz networks or dual-frequency networks of 2.4GHz and 5.0GHz.

- If you are using a dual-band router (2.4GHz and 5GHz frequency share a Wi-Fi account.), you can connect the device using the AP mode.
- Or you can log in to the management page of your router and change the SSID of the 2.4GHz and 5GHz networks to differentiate them.

FCC Warning Statement:  
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into a outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:  
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment must not be co-located or operating in conjunction with any other antenna or transmitter.

These conditions: (1)This device may not cause harmful interference, and (2)This device must accept any interference received, including interference that may cause undesired operation.
