

# LS-21CS/21CA/21JS/21JA/21US/21UA User Manual

## Specifications

- ◆ Operating temperature: 0 ~ 50°C
- ◆ Weight: 360g

## Features

- ◆ Operate two PS/2 / USB computers with one keyboard, mouse and monitor.
- ◆ Simply plug the attached cables-nothing else required.
- ◆ Full keyboard and mouse emulation for error-free booting.
- ◆ Hot key commands and LED indicators for computer selection.
- ◆ No software and power required.
- ◆ Support video resolution up to 2048\*1536。
- ◆ Compatible with all operating systems.

## Installation

1. Make sure that power to all the devices you will be connecting to have been turned off, and that all devices on the installation are properly grounded.
2. Plug your keyboard, mouse and monitor into the unit's console ports.
3. Plug the device's built-in cables into the keyboard, mouse and monitor ports of your computers. The keyboard and the mouse plugs are color-coded and marked with an indicator icon.
4. This completes the installation. Power on your computers and you are ready to go.

## Operation

Toggle the KVM control between the computers by tapping the CTRL key twice.

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.

**This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.** These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However,

there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
