

## **Operational Description**

1. IC AB1120(U1) is used for wireless transmission chip based on Bluetooth 3.0 technology. The signal to the receiver by built-in RF, and a clock frequency of the 26MHz as base clock signal, the 2.4G RF transmitting frequency is 2402 to 2480MHz with GFSK modulation.

2. The work voltage is DC 1.2V by NI-MH rechargeable battery, and you could to recharge the battery via USB charging port, it supports only charging function, it does not support that any information is exchanged between device and PC or laptop.
