Safety Instructions

These instructions are intended for the safe and effective use of your phone. Please follow these guidelines. Failure to do so might cause the product to malfunction, or even a potential hazard to your health.

	Do not use your phone while driving. Park the car before making or answering a call.
	Turn off your phone when refueling. Do not use your phone near a gas station, flammable, or chemical substances. Warning! It may explode when exposed in fire.
	Do not use your phone during a flight. Wireless devices can cause interference in the aircraft.
	Do not use your phone near medical equipments like pacemaker without requesting permission from the physician or medical staff.
	Radio signals may affect the performance of your phone.
	Do not touch any exposed parts of the antenna while in a call, it will affect the call reception and waste battery power.
	Do not attempt to disassemble or modify the phone by yourself. Only authorized personnel should perform this service.
	When you connect accessories to your phone, please read the safety guidelines carefully. Do not use unauthorized products.
	Please use only the original accessories or products that are authorized by our company.
	Keep out of children's reach.

Phone controls

Use the control buttons to do the following:

MENU/SELECT key

- Menu: Press to open and access the phone menu.
- Select: Press to accept the selected function.

MESSAGE key

- Press to access the Write message home menu.

NAMES/CLEAR/BACK key

- Names: Press to access the Phonebook records.
- Clear: Press to delete a number or a character input.
- Back: Press to return to the previous screen display.

POWER/EXIT key

- Press to end an active call.
- Press to exit a menu and return to standby mode.
- Power On/Off: Press and hold for 3 seconds to turn the phone On or Off.

CHARGE LED light

- Lights up when charging the battery.

Navigation keys (UP-DOWN/LEFT-RIGHT)

- Press to move the selection up or down during options programming.
- Press to move around the LCD screen when writing or editing a message.
- Press to open the pre-programmed key shortcut function.

CALL/REDIAL key

- Press to make a call.
- Redial: Press in standby mode to open the call lists, select the number and then press CALL/REDIAL.

SPEAKERPHONE key

- Press to activate the speakerphone call function.

Preparation before use**Installing the curl telephone line cord**

- 1** Insert the telephone line jack at the End of the curl cord into the handset. Push the jack until it snap in place.
- 2** Arrange the cord to fix inside the groove on the base unit as shown.
- 3** Insert the other end of the telephone line jack into the base unit. Push the jack until it snap in place.

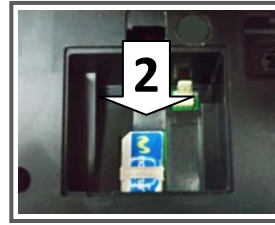

4

Installing the SIM card and battery pack

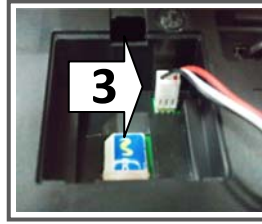

Your phone will not work without the SIM card.

The Subscriber Identity Module (SIM) card identifies you to the wireless network.

- 1 Remove the battery cover on the base unit.
- 2 Insert the SIM card into the slot with copper contacts facing down the pins.

- 3 Insert the jack of the battery pack into the terminal pins.
- 4 Insert the battery pack and arrange the wires.
- 5 Replace the back cover and push until the locking tab clicks into place.

Charging the battery

- 1 Connect the AC adapter plug to an electrical outlet and connect the other end to the USB jack at the right side of the phone.
- 2 When the power comes on, the charge LED will lit, "Charging..." will be displayed on the LCD screen and the charge indicator will start to scroll. It will only stop after the battery comes to full charge.
If a battery is completely discharged, it may take a few minutes before the charge indicator appears on the LCD screen.
- 3 To fully charge when the phone is discharged, keep charging for at least three hours.
- 4 After the battery charge comes to full, disconnect the charger from phone and the socket of the alternating current.

Warning!

Do not take out the battery when it is being charged. To ensure the best performance, please use original accessories. Using other accessories may affect the performance of the phone. Personal data and settings in your phone and SIM card might get lost when you take out the battery.

Power ON/OFF

Press and hold the **POWER** key to turn on or power off your phone.

Security number

PIN1: PIN (Personal Identity Number), is usually provided to a SIM card by the network operator. If you enter a wrong PIN three times in a row, it will be locked. You need to enter your PUK (Personal Unblocking Key) number to unlock. Please contact your network operator for more details.

❓ **PIN2:** PIN2 is provided to some SIM. If you enter a wrong PIN three times in a row, it will be locked. You need to enter your PUK2 to unlock. Call your network operator for more details.

❓ **PUK:** PUK (Personal Unblocking Key) is used to unblock the PIN. PUK is provided to a SIM card. If you lose or forget the password, contact your network operator.

Phone code: Turn on the Phone code for security and prevent the phone from unauthorized use.

Phone features

Make a call

You have several choices for placing a call.

Dial the number Lift the handset or press **SPEAKERPHONE** key, dial the phone number and then press **CALL** key to dial out the number.

Press **CLEAR** key to delete a wrong entry.

Dial from contacts Open the Phonebook list and select the contact you wish to call. Press **CALL** key to dial out the selected record. Communicate through the speakerphone or lift the handset.

Dial from the call list Press **CALL** key, the call lists will display starting from the most recently called number. Press **CALL** key again to automatically dial the displayed record, or press **Up** or **Down** key to scroll the list and then press **CALL** key to dial the selected record.

Communicate through the speakerphone or lift the handset.

NOTE: *The phone is equipped with an auto-dial function. It will automatically send out the number in a few seconds after input.*

Answer a call

When a call comes in, the phone will behave according to the setting of the phone profile. It will show the caller's name if the network supports it. The caller's name display depends on whether you have saved it in your phonebook.

Lift the handset to answer the call, or press **CALL** key to answer in speakerphone mode.

Options with the handset while in a call:

Mute a call Press Options>**Mute** to deactivate the microphone. Press Options>**Unmute** to return to normal call conversation.

Adjust the call Volume Press Option>**Volume** to adjust the call volume. Press **Right** key to increase, or press **Left** key to decrease the volume level. Press **Accept** to confirm the setting.
OR, adjust the volume direct by pressing the **Left** or **Right** key to open the call volume indicator. Press **Right** key to increase or press **Left** key to decrease the volume and then press **Accept** to confirm.

Hold a call Press Option>**Hold** to hold the call. Press Option>**Retrieve call** to retrieve the held call.

Access the Phonebook Press Option>Phonebook to access the phonebook list.

Options when receiving an incoming call:

Turn off the Ringer Press **Ringer off** to turn off the ringer.

Reject a call Press **End** or **Exit** key to reject the call.

To end a call conversation

Press **End** or **Exit** key, or return the handset to the cradle to end the call.

Emergency calls

You do not need to own a SIM card to make emergency calls. Emergency calls may differ from different network operators, please contact your network operator to get your local emergency call number.

To make an international call

To make an international call, press * key twice to display the “+” character on the screen, and then enter the country code, area code (without the first zero), and the phone number:

For example; Enter **505** for Nicaragua, **44** for UK, **86** for China.

Enter +8613798297223, when making an international call to China.

Call Voicemail

Before using this feature, first setup the Voice mailbox number in Menu>Short Messages

> Voice mail>**Voice mailbox number**

- 1** Select **Listen to Voice Mail messages**.
- 2** Your voicemail number is dialed.
- 3** When the call connects, follow the voice prompt to retrieve your voice mail message.

Keypad lock

To enable a permanent keypad lock, activate the setting on Menu>Settings>Phone settings>**Keypad Locking Settings**.

Call Records

Your phone records the Missed call, Outgoing call, Incoming call, and Call Duration.

Missed Call

The phone records the latest list of unanswered incoming calls.

- 1** In the Calls home menu, select **Missed Call**.
- 2** Press **Up** or **Down** key to browse the list.
- 3** Press **Option** and then select; **Show number, Call, Send SMS, Edit, Delete, Delete all, Add to blacklist, Add to friendlist**.

Outgoing Call

The phone stores the list of phone numbers that you have most recently dialed or attempted to call.

- 1** In the Calls home menu, select **Outgoing Call**.
- 2** The dialed call list will display, select the record you wish to view.
- 3** Press **Option** and then select; **Show number, Call, Send SMS, Edit, Delete, Delete all, Add to blacklist, Add to friendlist**.

Incoming Call

The phone records the list of answered incoming calls with the telephone number or the name (if the caller's number is identified with the name and number that is stored in the Phonebook memory), date, and time of the call.

- 1** In the Calls home menu, select **Incoming Call**.
- 2** The received call list will display, select the record you wish to view.
- 3** Press **Option** and then select; **Dial, Send SMS, Delete, Save Number, Delete all,** or **Show number**.

Call duration

The phone records the accumulated time of calls for outgoing calls, incoming calls, and the duration of time of the latest call.

- 1** In the Calls home menu, select **Call duration**.
- 2** The LCD screen will display the **Outgoing Duration, Incoming Duration,** and the **Last Call Duration**.
Press Reset key to reset the time count back to zero.

SIM Tool Kit

This menu allows you to access a range of SMS based services that helps you do more. Simply select the desired service from the service menu. To get the list of services available for your phone or for assistance on any of these services, please call your SIM network. There are different menus according to different SIM cards.

Phonebook

To view the contacts on your phone, press **NAMES** key or press Menu>**Phonebook** and then select **Browse>ALL/SIM card/Family/Friends/Office/Others**.

Browse mode

A way to find a contact quickly is to press a letter key (**A~Z**) that corresponds to the first letter of a name, and the search will jump to the first entry beginning with that letter.

Press **Up** or **Down** key to scroll through the list. Press **Option** to do the following;

Details Displays the number and the contact memory location.

Call Calls the selected contact.

- Send SMS** Opens the SMS write menu for writing message to the selected contact.

- Edit** To edit the number and the name. For contacts stored on the phone memory, it will include to edit the group memory location.

- Send name card** To forward the name and number of the contact as content of a message.

- Delete** Deletes the selected contact.

- Add to blacklist** Adds the contact into the Firewall>Black list memory.

- Add to friendlist** Adds the contact into the Firewall>Friend list memory.

- Add to speed dial** To assign the selected contact into the Speed dial memory, select the memory location from 2~9.

Add new Contact

The contact will be stored in the SIM memory by default. To store a contact in the phone memory, set the Phonebook>Setting>Save to, and select **Save to Phone**. To store a contact in the phone memory;

- 1** In the Phonebook menu, select **Add new Contact**.
- 2** Input the number and then press **Accept**.
- 3** Input the name and then press **Accept**.
- 4** Select the group memory location: Family, Friends, Office, or Others.
- 5** Press **Accept**.

Speed dial

Program a speed dial numbers to the keys 2 ~ 9 and make a call via speed dial.

- 1** In the Phonebook menu, select **Speed dial**.
- 2** Select a Speed dial key location and then press **Accept**.
- 3** Select **Set/Change**.
- 4** Browse the phonebook record you wish to assign and then press **Accept**.

To make a Speed dial call;

In standby mode, press the Speed dial key memory location and then press **CALL** key to dial out the stored number.

Setting

To set the directory of the storage memory, and ring tone for the group phonebook.

In the Phonebook menu, select **Setting** and then select;

Save to Sets the memory storage location; **Save to SIM** or **Save to Phone**.

Ringtone Sets the ring tone for each group memory. Select Family, Friends, Office, or Others and then set the desired ring tone from the list.

Used space

To check the storage status of the SIM and Phone contact memory.

Fixed dial

This function applies when the SIM card support this feature. The PIN2 must be entered to enable the FDN function. The outgoing call is restricted only to the phone numbers stored in the FDN memory.

SDN phonebook

The numbers stored in the SDN directory are pre-installed by the service provider.

Record manager

To copy, move, or delete SIM or Phone contacts.

- 1** In the Phonebook menu, select **Record manager**.
- 2** Select; **Copy SIM to phone, Copy phone to SIM, Move SIM to phone, Move phone to SIM, Delete all SIM entries, or Delete all phone entries**.
- 3** Follow the screen prompt to confirm the next move.

Short Message

Write message

Before you start, make sure that the number of the service center is set. The number is supplied by the service provider and is usually saved on the SIM card.

- 1** Press Menu and then select Short Message>**Write message**. For quick access to

the Write message menu, press **MESSAGE** key in standby mode.

- 2 Type the message. You will be able to track the number of characters that you are creating as you type.

Press **CLEAR** key to delete a wrong input, press and hold **CLEAR** key to delete the whole entry.

Press **#** key repeatedly to set the text input mode; Abc, abc, ABC, 123, Es, es, or ES.

Press **0** key to add space.

Press **1** key repeatedly to input “, . ? ! 1” characters.

Press ***** key to open the special symbols menu, use the navigation keys to scroll to the desired character and then press Accept to input.

- 3 After completing the message, press **Option** and select;

To return to the original SIM LOCK status, input ***#247#** and restart the phone.

Maintenance

Battery instructions

When the phone automatically turns off or indicates the alarm information of power shortage, please charge the battery in time.

- For the first few times, please charge the battery fully.
- When not in use, please separate the battery with power supply. Overcharging will shorten the life of the battery.
- Do not expose your products to extreme high or low temperatures. Do not expose the battery to temperature above +40 °C.
- Do not use damaged battery.
- Do not expose your mobile phone to direct sunlight or in hot areas. High temperatures can shorten the life of electronic devices.

- Do not expose the battery into fire or throw it away. Return the worn-out battery to the provider or put it in the appointed recycle place. Do not throw it in familial rubbish.
- Follow these guidelines to protect your product:
 - keep the product out of children's reach
 - Keep your product dry. Do not expose it to liquid or moisture.
- Do not short-circuit the battery, as this can cause excessive heat to bring about fire.
- Do not expose your mobile phone to direct sunlight or in hot areas. High temperatures can shorten the life of electronic devices.
- Do not attempt to disassemble the phone and battery by yourself.
- Prevent any liquid from leaking into your phone.
- Please only use original accessories. Using any unauthorized accessory may affect your mobile phone's performance.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference,
- and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .

This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
