Dual SIM Operation Mode

双卡操作方式

The common PCBA for phone models QS302 and LQ310 is manufactured with an optional second SIM card position. However, Phone Models QS302 and LQ310 are both sold with single SIM configuration. Thus, dual SIM configuration cannot be considered for these two models.

Still, if the second SIM card location is used, the operation mode would be dual SIM, single standby. The two SIM cards cannot work at the time. So, conference call with two SIM cards in a phone is not supported.

QS302和LQ310的主板设计是预留了两个SIM卡位。但是这两个型号都是单卡。所以不用考虑双卡情况。如果在双卡配置下，SIM卡的操作模式是双卡单待。两个卡不能同时操作。所以，两个卡无法进行电话会议。
