	Vibrating and Ringing
	Silent

### **Back Light**

You can set the Back Light for the display and keypad through options in the menu. The backlight will switch off automatically if no key operated for a while.

### **IMPORTANT INFORMATION**

#### **Use of Passwords**

Your mobile phone and SIM card have various passwords. Those passwords avoid unauthorized use of your phone and SIM card. You can change PIN, PIN2 and phone password in the "Settings > Security"

#### **Phone Code**

The Phone code can be used to avoid unauthorized use of your phone. The factory setting for the phone code is **4321**. If phone lock is enabled, you will be asked to input the phone password when you switch on your phone.

#### **PIN (4 to 8 digits)**

The PIN (Personal Identification Number) code protects your SIM card from unauthorized use. The PIN code is usually supplied with the SIM card. When the PIN code request is enabled, the password is asked every time the phone is turned on.

Three times wrong PIN input, the SIM card will be locked and you will need to use the PUK to unlock it. PUK is usually set by the network operator.

1. Enter the correct PUK to unlock the SIM card, and then enter the new PIN and press **OK**.

2. If you are prompted to enter the new PIN again, enter it and press **OK**.
3. If the PUK is correct, the SIM card will be unlocked and the PIN will be reset.

**PUK (8 digits)**

The PUK (Personal Unblocking Key) code is required to change a blocked PIN code. Please contact your network operator for the code.

Note: Ten times wrong input in succession, the SIM card will be invalid and you need to consult with your network operator for a new SIM card.

**PIN2 (4 to 8 digits)**

The PIN2 code, supplied with some SIM card, is used for some functions, such as Call Cost, Fixed Dial and so on. Please consult your network operator to confirm whether your SIM card supports those services or not.

Three times wrong PIN2 code input, the SIM card will be locked and you will need to use the PUK2 to unlock it.

1. Enter the correct PUK2 to unlock PIN2, and then enter the new PIN2 and press **OK**.
2. If you are prompted to enter the new PIN2 again, enter it and press **OK**.

**PUK2 (8 digits)**

The PUK2 code, supplied with some SIM card, is required to change a blocked PIN2 code. It may be supplied with the SIM card. If not, contact your network operator.

Note: Ten times wrong input in succession, the SIM card will be invalid and you need to consult with your network operator for a new SIM card.

### **Barring Code**

To activate call barring, you need a Barring Code. You obtain the password from your service provider.

### **Battery Information**

#### **Charging and Discharging**

- The charger is designed to be used in temperatures between 0°C to 40°C.
- Do not charge the phone in wet and damp conditions.
- Use only batteries approved by the phone manufacturer and recharge your battery only with the charger approved by the manufacturer.
- We strive to produce products in compliance with global environmental standards
- The charger meets the standard for safety of information technology equipment and office equipment use. It must be used for this purpose only.
- Your phone is powered by a rechargeable battery. Full performance of the battery is achieved only after two or three complete charge and discharge cycles.
- When the battery level is low, "Low Battery" will be displayed on the LCD screen. If you have selected Alert Tone (Warning Tone of any profile in Profiles), the phone will sound the alert tone.
- When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a

charger for longer than 12 hours, since overcharging may shorten its life.

- Temperature extremes will affect the ability of your battery to charge.

#### **Tips for Battery**

- Placing the battery in hot or cold places, such as in a closed car in summer or winter, will reduce the capacity and lifetime of the battery.
- Do not let the metal contacts on the battery touch other metal contacts. It could short-circuit and damage the battery. Use the battery only for its intended purpose.
- Do not disassemble or modify the battery by yourself.
- Do not clean the battery with water or any organic solvent.
- Always keep the battery dry.
- The battery can be charged and discharged many times but it will wear out with time. When the talk and standby time is obviously shorter than normal, please change with the original battery approved by manufacturer.
- Do not short-circuit the battery.
- Turn off mobile phone before removing the battery.
- Do not dispose of batteries in fire.
- If you smell anything strange from the battery or find that the battery is overheated, you should stop using it immediately and contact the authorized After Service Center in your region.
- If you don't use the battery for a long time, please fully charge the battery before you store it.

- Batteries should never be placed in municipal waste. Batteries must be recycled or disposed of properly. Please follow local regulations for disposal of batteries.

### **Usage & Maintenance**

To keep your product working well, take a moment to review the following usage & maintenance tips, which will help you to fulfill any warranty obligations and to enjoy this product for many years.

- Keep your phone and all its parts and accessories out of children's reach.
- Your products are not water-resistant. Keep it dry. Precipitation, humidity and liquids contain minerals that will corrode the connectors.
- Always treat your products with care and keep it in a clean and dust-free place.
- Do not expose your product to extreme high or low temperatures. Your phone operates best in temperature between 15 °C and 25°C. Minimum and maximum temperatures recommended by the manufacturer are -10°C and 55°C.
- Do not expose your product to open flames or lit tobacco products.
- Do not attempt to disassemble or modify your product. Only authorized personnel should perform service.
- Do not drop, throw or try to bend your product.
- Do not paint your product.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean it.

- Keep anything magnetic, such as credit cards, far away from your product.
- If you find that the battery has any crack, deformation or anything else, you should stop using the battery immediately.
- If the electrolyte leak out and contact your skin or clothes, you should immediately use soap and clean water to clean it. In case the electrolyte spatters into your eyes, you must use the clean water to wash your eyes thoroughly and go to the hospital immediately.
- If your phone or any accessory doesn't function normally, please send them to the nearest authorized service facility. The qualified personnel there will assist you, and if necessary, arrange for service.

### **Emergency Calls**

This phone, like any wireless phones, operates using radio signals. Wireless networks cannot guarantee connection in all conditions. Therefore, you should never rely solely upon any wireless phone for essential communications (e.g. medical emergencies)

To make an emergency call:

- 1> Switch your phone on.  
Some networks may require that a valid SIM card is properly inserted in the phone
- 2> Dial the official emergency number. Emergency numbers vary by location.

While making an emergency call, please remember to give all information as correctly as possible. Never end the call until you are given permission to do so.

## **2 Getting started**

### **2.1 The Battery**

The lithium battery can be charged and discharged hundreds of times. Please use the approved batteries, and only use the battery charger approved by the Mobile Phone producer to charge your battery.

### **2.2 Install & remove a battery**

#### **Remove:**

- (1) Slide forward the bottom off the back cover to remove.
- (2) Lift the battery from its slot and take it out.

#### **Install:**

- (1) Place the battery into the battery slot.
- (2) Slide the back cover toward the top of the Mobile Phone to lock the cover into its place.

#### **Warning:**

- (1) There may be the risk of explosion if the battery is replaced by the wrong type.
- (2) Dispose of used batteries according to the guidelines.

### **2.3 Charging**

To plug in the power charger, the charger cable plug at the bottom of the Mobile Phone

#### **Note:**

1. It is beneficial to the battery to charge it until full at the first three times.
2. When charging, don't remove or take out off the battery to avoid the battery circuit to burn out.
3. While charging, it is normal that the Mobile Phone and charger will become hot.
4. If the battery is completely empty, it may take a period of time before the charging icon appears on the display.

Warning: Provides charging temperature range -5 °C to 55 °C, over this range, please do not use the charging equipment. And be sure to use the charger provided by the supplier. Use of an unapproved charger may be dangerous and breach of warranty of the equipment approval and terms.

Notice:

The socket-outlet shall be installed near the equipment and shall be easily accessible.

## **2.4 SIM card installation**

Turn off the Mobile Phone, and take out the battery.

Keep the gold color side of the SIM card downward, and slide it gently to the right place.

## **2.5 Memory card installation**

## **5 Safety information**

### **5.1 Operating environment**

Remember to follow any special regulations in force in any area and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. Do not keep the device near credit cards and other magnetism medium, some accessories can bring magnetism that may be delete the data.

### **5.2 Electronic devices**

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

#### **5.2.1 Pacemaker**

Pacemaker manufacturers recommend that a minimum separation of 6in (20cm) should be maintained between a wireless Mobile Phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. To minimize the potential interference, persons with pacemakers should do as below:

Always keep the device more than 6 in (20 cm) from their pacemaker when the device is switched on.

Not carry the device in a breast pocket.

Hold the device to the ear opposite the pacemaker.

If you have any reason to suspect that interference is taking place, switch off your device immediately.

### **5.2.2 Hearing aids**

Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

### **5.2.3 Other medical devices**

Operation of any radio transmitting equipment, including wireless Mobile Phones, may interfere with the functionality of inadequately protected medical devices. Switch off your Mobile Phone in health care facilities when any regulations are posted in these areas instructing you to do so.

### **5.2.4 Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. For more information, check with the manufacturer or its representative of your vehicle or any equipment that has been added.

### **5.3 Potentially dangerous situations**

Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in body injury even death. Switch off the device at refueling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or

butane), and areas where the air contains chemicals or particles such as grain, dust or metal powders.

### **Operating instructions of English editor**

Your phone provides you with different input methods for the convenience of using other function. You can enter texts by keypad wherever texts are required.

Input interface key function:

**Alt Key:** Switch the input method.

**“sym” Key:** Enter symbols while typing SMS, email etc.

**Hang-up key:** Retreat from the edit interface.

**Capital Key** is used to switch between Capital letter and Small letter.

Capitalized, small English letters and numbers:

To select “ABC or abc or 123” input method, you can input capitalized, small English letters or numbers.

#### **Punctuation Input:**

Enter the “sym” key to switch to the punctuation input. Press the up, down, left or right key to select the desired one, and press the left selection key to choose and press the corresponding number key to enter.

### **Application of USB storage function:**

Precautions before using:

- Please maintain correct operation of USB equipment connection and disconnection.
- Please do not use windows format command to carry on the format operation to the mobile disk of cell phone; otherwise, it will result in the damage that cannot be repaired any further.

- USB operation environment:
  - a. windows2000 / XP.
  - b. Other operating systems may require the installation of USB driver before successfully creating the connection of PC and cell phone.

**Note:** The phone can use USB function (like charging) under switched off mode.

When USB cable is plugged in, phone will have the following options:

- Mass storage: the phone can be connected to the PC and used as a USB Flash Disk.
- Webcam: the phone can be connected to the PC and used as a PC camera
- COM port: the phone can be connected to the PC and used as Dial-Up Network.

**Note:** The phone can use USB function (like charging) under switched off mode.

When USB cable is plugged in, phone will have the following options:

- Mass storage: the phone can be connected to the PC and used as a USB Flash Disk.
- Webcam: the phone can be connected to the PC and used as a PC camera
- COM port: the phone can be connected to the PC and used as Dial-Up Network.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

**IMPORTANT NOTE:**

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause

harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

## **Specific Absorption Rate (SAR) information**

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum

of 1.5 cm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
