Getting started

## Installing SIM Card and Memory Card

SIM Card

Before using the phone, you must insert valid SIM (Subscriber Identity Module) card in the phone. SIM card is provided by network supplier.

All the information related to network connection is recorded in the chip of SIM card, also the names, telephone numbers and SMS that storing in the Name of SIM card. You can take out SIM card from your phone, and use it in any GSM mobile phone (new mobile phone can read SIM card automatically).

In order to avoid losing or damaging the information saves in SIM card, please don't touch the metal contact surface, and place SIM card at the place that away from electricity and magnetic force. Once SIM card is damaged, you can't use the phone normally.

Prompt: Please make sure to power off the phone before taking out SIM card. It is absolutely forbidden to insert or take out SIM card with external power supply; otherwise it may damage SIM card and the phone.

Inserting and Taking out SIM Card

Metal contact surface of SIM card is easily scratched. You must take out SIM care carefully before the assembly.
Power off the phone, remove the rear cover, battery or other external power supply.

Make the end of SIM card with cutting angle inside and aim at the card slot of the phone and metal surface of SIM card face downward, then insert SIM card to the card slot of the phone, the other SIM card is also inserted in this way.

When taking out SIM card, directly pull it outward and then can take out SIM card.

Prompt: Without special explanation inserting two SIM cards are defaulted in the manual. If you just insert one SIM card, maybe some options of the menu will not be shown.
Memory Card

Aim at the memory card slot and push the memory card gently, and the card should be inserted correctly.

Prompt: If the memory card is failed, please check whether it is correctly placed and good contact of metal point.

Battery

Install the Battery

Take off the back cover of the mobile.

Make one end of battery with metal surface aim at the battery connector.

Then gently press the battery downward using the finger, and then press the other end to install the battery.

Prompt: Please operate correctly to avoid damaging the battery connector.

Note

❖ Please switch off you phone before you remove or insert SIM card

❖ The plug-in SIM card and its contacts can be easily damaged by Scratching or bending.

❖ Keep your phone and its accessories away from children.

Security Password

PIN

Restore factory settings

With this option, you can restore the factory settings.

The default password is "0000".

FCC RF Exposure Information and Statement
The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.
Device types: U-600-2(FCC ID:ZU3UNNECTOPRO) has also been tested against this
SAR limit. The highest SAR value reported under this standard during product
certification for use at the ear is 0.577W/kg and when properly worn on the body
is 0.568W/kg. This device was tested for typical body-worn operations with the
back of the handset kept 1.5cm from the body. To maintain compliance with FCC
RF exposure requirements, use accessories that maintain a 1.5cm separation
distance between the user's body and the back of the handset. The use of belt
clips, holsters and similar accessories should not contain metallic components
in its assembly. The use of accessories that do not satisfy these requirements
may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the
following two conditions: (1) this device may not cause harmful interference,
and (2) this device must accept any interference received, including
interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference
caused by unauthorized modifications to this equipment. Such modifications
could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for
a Class B digital device, pursuant to part 15 of the FCC Rules.   These limits
are designed to provide reasonable protection against harmful interference in
a residential installation.   This equipment generates uses and can radiate
radio frequency energy and, if not installed and used in accordance with the
instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular
installation.
If this equipment does cause harmful interference to radio or television
reception, which can be determined by turning the equipment off and on, the
user is encouraged to try to correct the interference by one or more of the
following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which
the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
