Unpack the box

1. Remove the components and tablet from the box. Save the packing materials in case you need them later.
2. Remove the documentation package for important information.

All product specifications, configurations, prices, system/component/options availability are all subject to change without notice.

Check the components

Your tablet comes with:

- AC adaptor (2-pin or 3-pin)
- Micro-USB cable
- Several documents, including Instruction Manual for Safety and Comfort.

It may also ship with documentation for other software that may be pre-installed on your tablet. Some software may differ from its retail version (if available), and may not include user manuals or all program functionality.

If any of the items are missing or damaged, contact your dealer immediately.

Charging your tablet

Your tablet contains a rechargeable battery that may need to be charged prior to use. The fastest way to charge your tablet is with the included AC adaptor plugged into a wall outlet.

1. Plug the USB connector of the Micro-USB cable into the AC adaptor and the other smaller connector into the Micro-USB port on your tablet.

Depending on the model, either a 2-pin or 3-pin AC adaptor will be bundled with the tablet.

2. Plug the AC adaptor into a wall outlet.

In “suspend or shutdown mode,” you can also charge your tablet, although more slowly, by connecting the Micro-USB cable to the USB port on your PC. Please make sure your PC is turned ON while charging via USB. If your PC is turned OFF, depending on PC specifications, the tablet battery may discharge. We recommend that you do not use your tablet while charging via USB as auto shutdown may occur if the battery charge is too low.

Information for Wireless Devices

Wireless devices and your health

Wireless products, like other radio devices, emit radio frequency electromagnetic energy. The level of energy emitted by Wireless products however is far much less than the electromagnetic energy emitted by wireless devices like for example mobile phones.

Because Wireless products operate within the guidelines found in radio frequency safety standards and recommendations, TOSHIBA believes Wireless products is safe for use by consumers. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and committees of scientists who continually review and interpret the extensive research literature.

In some situations or environments, the use of Wireless products may be restricted by the proprietor of the building or responsible representatives of the organization. These situations may for example include:

- Using the Wireless products equipment on board of airplanes, or
- In any other environment where the risk of interference to other devices or services is perceived or identified as harmful.

If you are uncertain of the policy that applies on the use of wireless devices in a specific organization or environment (e.g. airports), you are encouraged to ask for authorization to use the Wireless device prior to turning on the equipment.
