

The main connection through the USB interface chip RT2571, powered by USB 5V LDO transferred through the supply of RT2571 and RT2528 3.3V/1.8V, 40MHZ crystal oscillator RT2571 CPU, RT2528 is the WIFI IC for modulation, signal modulated by the RT2528 amplified output to the antenna through 12LP14A, and the transmit frequency range is from 2412MHz to 2462MHz.
