WanYin UVC Sanitizer with Wireless Charger and Sound Machine  
Power Adaptor

Certificate/Warranty Card  
Instruction manual

Remove all items from the packaging and keep the packaging; if you need to dispose of it, please follow local regulations.

The clock has a pre-installed battery backup that will keep the time in case power is interrupted (like by a power outage, for example). To activate this back-up function, simple pull out the insulator from the battery compartment in the sanitizer compartment. If you notice that battery backup is no longer working (the battery indicator turns on), simply replace the CR2032 coin-cell battery behind the circular battery door. Use a coin to open the door and access the CR2032 battery.

1. Press & hold the button on the top of the clock/sanitizer until the hours digits flash.
2. Use the VOL/SET + & - buttons on the top of the clock/sanitizer to adjust the hour.
3. After hour is set, press the button until the minutes digits flash.
4. Use the VOL/SET + & - buttons to adjust the minutes.
5. After minutes is set, press the VOL/SET + & - buttons to choose 12-hour (AM/PM) or 24-hour (12-hour time is the default).
6. The clock default mode is 12 hours system with AM mode and PM mode.

1. Press and hold the button in the top if the clock/sanitizer until the hour digits flash on the display.
2. Use the + and - button on the top of the clock/sanitizer to adjust the hour.
3. Press the button once, the minute digit flash on the display.
4. Use the + and - button on the top of the clock/sanitizer to adjust the minute. After the minute is set, press the button once to select the alarm sound, press the +/- button to select either nature sound or buzzer alarm sound (the default alarm sound is nature sound). If nature sound alarm sound is selected, press the MUSIC button to select the nature sound and the number of nature sound will be shown on the display.
5. Follow the short press AL1 key to enter the alarm volume setting mode, short press the +/- key to set the alarm volume.
6. Follow the short press AL1 key to exit and save the current settings, or do not operate for 20 seconds to automatically exit and save the current settings.

Remarks: To set the time for alarm 2: follow the step above, using the “闹铃2” button instead of “闹铃1” button.

1. Short press the TIMER button once, the 15-minutes indicator lights up denoted the timer is set to 15 minutes
2. Short press the TIMER button twice, the 30-minute indicator lights up denoted the timer is set to 30-minutes.
3. Short press the TIMER button three times, the 60-minute indicator lights up denote the timer is set to 60-minutes.
4. Short the TIMER button again to turn off the timer function. To turn off the timer function completely, short press the TIMER button till all indicators are turned off.
5. The timing function is only valid for natural sound and Bluetooth.

1. Open the cover of the clock/sanitizer. Then place the item you want to sanitize inside. Close the cover and choose the sanitization cycle you want to use.

2. Standard clean cycle (around 10 minutes): Press the “UV” button once to start standard sanitization cycle. The UV indicator on cover turns on red during sanitization and a number “10” appears on the clock display denote the sanitization time is 10 minutes. The UV indicator turns off when the sanitization is completed.
3. Deep clean cycle (around 20 minutes): Press and hold the “UV” button until the UV indicator on the cover flashes twice. The UV indicator on cover turns on red during sanitization and a number “10” appears on the clock display denote the sanitization time is 10 minutes. The UV indicator turns off when the sanitization is completed.
4. To stop sanitization before the cycle is complete: Press the UV button. The UV indicator on the cover flashes three times to indicate the cycle has stopped and it's safe to open the cover.

### Notes:

1. Please remove the protective film by following the direction shows on the label.
2. The UV indicator flashes if the cover is open when you try to start sanitization. For your safety, the sanitizer cannot proceed with sanitization if the cover is open. Make sure the cover is completely closed, then press the UV button again.
3. You can use deep clean cycle even for items that don't need it. There's no harm done to the item – it just takes longer to finish the cycle.

1. When the alarm sounds, press the SNOOZE/PLAY-Pause bar temporarily delays the alarm another 9 minutes until you turn it off.
2. This bar also adjusts the display brightness when the device is normal time mode. There is 3 level of brightness in the sequence of low-mid-high.
3. In Bluetooth audio mode, this bar plays or pauses playback.

1. Place your wireless charging-compatible device directly on the center of the top cover.
2. The indicator light turns red while your device is charging. This indicator turns green when your device is fully charge. For some mobile device (Apple iPhone) doesn't have the capability to generate full charge sign, the indicator will not turn to green but the device itself will stop the charging when it is fully charge. Your device screen displays the charging progress.

1. Short press the button to open the Bluetooth function and enter the automatic back connect mode for 10s, the Bluetooth light will slow flash; Without back connection after 10s, the Bluetooth light will fast flash and enter the pairing mode; Pairing and connecting successfully, the Bluetooth light will flash up and voice “Connected”.

## Product Feature

- 10W Fast Wireless Charge
- 2 Alarm Clock Mode
- UVC LED light Wave Length 270~280nm
- Dual channel stereo Bluetooth playback, built-in 6 sets white noise and natural music.
- Clock, Time Memory
- CR2032 Time Memory Battery
- AC-DC Adapter: DC9V

## About the UV sterilization

Ultraviolet (UV) light is invisible to the human eye. UVC part of the ultraviolet spectrum has been proved to have bactericidal effect, killing bacteria and viruses. Use the appropriate safety measures for the use of this product and follow the safety precautions. Ultraviolet radiation on porous parts or objects that are resistant to ultraviolet light has the opportunity to reduce the effect of disinfection, as they create many shadows that may prevent UV rays from hitting surfaces. Ultraviolet rays kill only the bacteria that hit the surface.

## Warranty

**Shenzhen Great Power Innovation and Technology Enterprise Co., Ltd.** (the “Company”) warrants to the original retail purchaser of this product or any part thereof, under normal use and conditions, be proven defective in materials or workmanship within one year from the date of original purchase, such defect(s) will be repaired or replaced with new or reconditioned products (at Company's option) without charge for parts and repair labor. To obtain repair or replacement within the terms of the warranty, the product should be delivered with proof of warranty coverage (e.g. dated bill of sale), specification of defect(s), transportation prepaid, to the company. For the details of after-sales support and return address, please call the customer service: 0755-21671965. Any action for breach or any warranty hereunder, including any implied warranty, must be brought within a period 12 months from the date original purchase. In no case shall, the company be liable for any consequential or incidental damages whatsoever. No person or representatives is authorized to assume for the Company and liability other than expressed herein in connection with the sale of this product. Manufacturer: Shenzhen Great Power Innovation and Technology Enterprise Co., Ltd. Manufacturer Address: No. 331, No. 335, Guiyue Road, Dafu Community, Guanlan Street, Longhua District, Shenzhen Distributor: Shenzhen Tianxingtai Optronics Technology Co., Ltd. Customer Service Tel: 0755-21671965

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IC Caution:

- English:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

This device may not cause interference.

This device must accept any interference, including interference that may cause undesired operation of the device.

- French:

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

L'appareil ne doit pas produire de brouillage;

L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

To maintain compliance with ICSED's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with RF Exposure guidelines, This equipment should be installed and operated

with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

FCC ID: ZY9-A20180

Manufacturer's Name: Shenzhen Great Power Innovation And Technology Enterprise Co., Ltd.

Model number: GP-A289

Operating Temperature: -10° C to 55° C

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 20mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

1. Use careful with the earphone maybe possible excessive sound pressure from earphones and headphones can cause hearing loss.

2. CAUTION : RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

3.The product shall only be connected to a USB interface of version USB 2.0

Function	EU Operation Frequency	Max RF outputpower:	Limit
BT	2402~2480 MHz	3.18dBm	10dBm.
WPT	110kHz~205kHz	-19.39dBuA/10m	66.02 dBuA/10m
