FCC COMPLIANCE STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
2. The user manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.
3. (a) For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual: **NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.
4. RF exposure warning: This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

For more information on how to set up your camera on Amcrest Cloud using a web browser, visit amcrest.com/amcrestcloudwebbrowser

The camera has now been successfully added to your Amcrest Cloud account.

AMCREST CLOUD MOBILE SETUP

5

Tap on **Add Camera**.

6

Give the camera a name (e.g., Garage, Living Room, Kitchen, etc.) and tap **Next** to continue.

6

If you are adding a new camera that does not have a QR code, scan the QR code on the back of the camera. If you already have a QR code, scan the QR code on the back of the camera.

7

Give the camera a name (e.g., Garage, Living Room, Kitchen, etc.) and tap **Next** to continue.

7

TROUBLESHOOTING/FAQ

HOW DO I ADD ADDITIONAL CAMERAS TO MY CLOUD ACCOUNT?

If you are on a free trial version of Amcrest Cloud and would like to add an additional camera to your cloud account, you will need to upgrade your cloud account to a premium plan. For more information on upgrading your cloud account, visit amcrest.com/cloud

If you are already on a premium cloud plan and would like to proceed with adding another camera to your account, log into your account on the Amcrest Cloud app for PC/Mac. To add a camera to your account, tap on the **+** icon in the main menu, tap on **Add Camera**, and follow the setup prompts that appear.

To add an additional camera to your cloud account on a PC or Mac, log into your account and click on the menu **+** icon, select **Add Camera**, and follow the setup procedures listed in the menu for more information on how to add additional cameras on your cloud account.

Visit amcrest.com/additionalcameras for more information on how to add additional cameras on your mobile device.

WHY AM I UNABLE TO LOCATE AN SSID?

Amcrest users using 802.11n and 802.11ac experience this issue if location permissions are not enabled on the device. The user when the app Android has implemented this feature to increase the overall security of your Wi-Fi connection as well as provide an added layer of protection for your mobile device.

I'VE LOCKED MYSELF OUT OF THE CAMERA ACCIDENTALLY.

As a security precaution, your Amcrest camera will lock out any user who tries to log in with the wrong password after a handful of consecutive attempts. If you find that you have accidentally locked yourself out, you can wait 5 minutes to log back in or you can power cycle the camera by unplugging and replugging the camera's power cable.

If you have forgotten your password entirely, you can hard factory reset the camera by pressing and holding the reset button down for 45 seconds. The reset button will either be on the back or on the interior of the camera. For more information on hard factory reset procedures for your device, visit amcrest.com/support

To locate an SSID, during WiFi setup on the Amcrest Cloud app, tap on **Scan** in the Ethernet WiFi Setup menu. A dialog box will appear prompting you to enable location permissions. Tap on **OK** to enable this feature and allow the app to scan for your WiFi network. Your SSID will appear. Select the WiFi network you would like to connect with and enter the WiFi password for your network.

If you are using the Amcrest View Pro app, you must enable location permissions to configure the SSID to your app. When you have enabled location permissions the SSID will show (greyed out) in the WiFi configuration menu where you can enter the WiFi password for your network.

For more information on how to locate an SSID on your mobile device, visit amcrest.com/androidip

HOW DO I SETUP MOTION DETECTION/PUSH NOTIFICATIONS FOR MY CAMERA?

By default, the Amcrest Cloud app will automatically send push notifications of a motion detected event, however, if you want to receive additional motion detection events from the Amcrest View Pro app you will need to make these configurations manually.

To setup push notifications on the Amcrest View Pro app, tap on the menu (☰) icon and tap **Push Notifications**. Next, select **Configuration** from the push notifications menu. Tap on the camera you wish to enable and toggle the push notification toggle switch to the 'on' position. When set, tap on **Motion Detect** to enable the camera for motion detection. When finished, tap on the **Save** icon to save the settings to your device. For more information on how to setup push notifications, visit: amcrest.com/pushnotifications

HOW DO I CHANGE MY VIDEO STREAM RESOLUTION?

On the Amcrest Cloud app, locate the camera you wish to modify and tap the **settings** (⚙️) icon. In the settings menu, tap on **Quality** and change the resolution accordingly. When the resolution has been changed successfully, tap the **Save** button in the upper left-hand corner to save your settings.

On the Amcrest View app, for efficiency purposes, the live stream is set by default to standard resolution (not HD). To enable HD, tap the resolution (📺) icon and then tap on the pencil icon next to HD. After setting the resolution, tap on **OK** to confirm your settings.

To sign up for an Amcrest Cloud account, enter your name, and choose a username and password for the cloud account. Enter the password again into the **Confirm password** section. Next, enter your email address. This will be the email address that will be associated with your cloud account. Enter the same email address into the **Confirm email address** section and press the **Sign Up** button when you are ready to create your account.

Accept the terms of use for the account. To view the terms of use, click on **View Terms**. Tap on **Agree** to accept the terms of use and proceed with Amcrest Cloud setup.

SETUP YOUR CAMERA WITH AMCREST CLOUD

AMCREST CLOUD MOBILE SETUP

Setup procedure for adding a new camera to Amcrest Cloud.

- Before starting, it is recommended to reset your camera. Simply unplug the power source and plug it back in.
- Please make sure your camera is plugged into a power source and an Ethernet cable is connected from the camera to your router. The Ethernet cable can be removed after setup.
- Make sure your camera and mobile device are on the same network during setup.

Once you have downloaded the Amcrest Cloud app, open the app and allow all notifications.

Press **Sign Up** to create a new Amcrest Cloud account. If you have already signed up for Amcrest Cloud, login and skip to step 5.

I MOUNTED MY CAMERA UPSIDE DOWN, HOW DO I FLIP MY CAMERA'S VIDEO STREAM?

On the Amcrest Cloud app, locate the camera you wish to modify and tap the **settings** (⚙️) icon. In the settings menu, tap on **Image Appearance** and tap on **Flip**. Return to the previous menu and tap the **Save** button in the upper left-hand corner to save your settings.

To flip or mirror the camera's video stream on the Amcrest View Pro app, tap the flip/mirror (🔄) icon. You can also flip/mirror this camera via the web interface on a laptop or PC. For more information on how to flip/mirror the video stream on the web interface, visit: amcrest.com/flipimage

For access to a full user manual for your specific Amcrest device, please visit amcrest.com/support

- 1 **AMCREST WIPI BULLET CAMERA INSTALLATION:** amcrest.com/wipibulletinstall
- 2 **AMCREST WIPI DOME CAMERA INSTALLATION:** amcrest.com/wipidomeinstall
- 3 **AMCREST WIPI SPEED DOME CAMERA INSTALLATION:** amcrest.com/wipispeeddomeinstall

- 6 **AMCREST WIPI SENTINEL CAMERA INSTALLATION:** amcrest.com/wipisentinelinstall

Physical installation should begin after initial setup of the camera has been completed.

PHYSICAL INSTALLATION METHODS

Addressing if you would like to use the Wi-Fi setup process, tap on **Setup Wi-Fi Setup**.

10

When you have finished entering the password, enter the password again in the **Confirm Setup Password** section. Only letters and numbers.

9

Set a new password for your device. The password must be between 8 to 32 characters long and contain both letters and numbers.

9

AMCREST CLOUD MOBILE SETUP

Confirm and adjust any required settings for your camera. When all settings have been confirmed, tap on **Finish**.

12

If you wish to enable Wi-Fi on your Wi-Fi device, **Scan Network List**. Enter the password for your Wi-Fi network in the **Password** field. Tap **Next** to continue.

11

Tap on **Next** to enable Wi-Fi on your Wi-Fi device. **Scan Network List**. Enter the password for your Wi-Fi network in the **Password** field. Tap **Next** to continue.

11

For more information on Alternative Access Methods visit: amcrest.com/alternativeaccess

- 6 **AMCRESTVIEW.COM SETUP**
This setup method will be used to setup a amcrestview.com connection for your device. The web page will connect via a 27" method through a designated web interface. For more information on how to setup a connection visit amcrestview.com, visit: amcrest.com/remoteaccess
- 7 **REMOTE ACCESS DESKTOP SETUP**
This setup method will be used for establishing and accessing your device remotely via a web interface on a desktop or laptop. For more information on local access desktop setup, visit: amcrest.com/remotewebsetup

ALTERNATIVE ACCESS METHODS

For additional setup methods for your Amcrest camera, refer to the Amcrest setup method provided below.

DESKTOP ACCESS METHODS

For more information on general PC based access, visit: amcrest.com/general/pcaccess

1 AMCREST SURVEILLANCE PRO

The most stable and recommended method for accessing your camera from a computer. It is a free software, provided by Amcrest, that provides a means of accessing your devices from one central location without the use of a plugin or web browser.

For more information on Amcrest Surveillance Pro, visit: amcrest.com/surveillancepro

2 AMCREST BLUE IRIS

Amcrest Blue Iris is a professional Windows based surveillance software that allows you to view and record up to 64 IP cameras, or ONVIF/RTSP based cameras simultaneously. It is a third party software that is compatible with a vast majority of IP cameras and DVR/NVR brands.

To purchase Amcrest Blue Iris, please visit: amcrest.com/blueiris

3 LOCAL DESKTOP ACCESS USING A WEB BROWSER

Most Amcrest cameras come equipped with the latest version of firmware that will allow you to access your camera from most mainstream web browsers without the use of a plugin. We recommend when accessing your camera to use Google Chrome since it is the most widely used and most efficient way to access your camera.

The camera will not work on older browsers such as Internet Explorer or other related web browsers. Mac users can use Safari or other compatible browsers as well to access their camera from a web browser.

If your camera has firmware that will require a plugin it is recommended to use Internet Explorer as an alternative means of accessing your camera on a browser until a viable solution is available to your device.

For more information on how to access your camera locally using a web browser, please visit: amcrest.com/webui

SETUP YOUR CAMERA WITH AMCREST VIEW PRO

AMCREST VIEW PRO ETHERNET WIFI SETUP

Recommended WiFi setup method for adding a new WiFi camera to Amcrest View Pro.

- Please ensure your camera is plugged into a power source and your Ethernet cable is connected from the camera to your router. The Ethernet cable can be removed after setup.
- Make sure your camera and mobile device are on the same network during setup.

Download and open the Amcrest View Pro app from the App Store or Play Store.

Android users using Android 8.0 and above and iOS users using iOS 13.0 and above please allow location access to the app. **Next** to continue.

Once all permissions have been allowed, tap the **Start** button to begin setting up your camera.

20

Android users must Android 8.0 and above and iOS users must iOS 13.0 and above. Please allow location access to allow the app to access connected WiFi devices.

Download and open the Amcrest View Pro app from the App Store or Play Store.

1. Once all permissions have been allowed, tap on the **Start** button to begin setting up your camera.

2

AMCREST VIEW PRO
WIFI CONFIG SETUP

Secondary setup procedure for adding a new WiFi camera to Amcrest View Pro.

- Please ensure your camera is plugged into a power source.
- Make sure your camera and mobile device are on the same network during setup.
- If camera fails to connect, please revert to Ethernet WiFi Setup, pp. 10.
- We recommend you have your Ethernet cable connected from the camera to your router for more stability. Ethernet cables may be removed after setup.
