We, Samsung Electronics, hereby declare the samples evaluated in this application are equivalent to production samples. It is not unexpected to find some subtests as much as more power reduction than the 3GPP recommended levels. Please refer to below comment.

Because of Spreadtrum Transceiver poor RF performance, We modify power reduction for HSPA signals. We could improve 5.9B Spectrum Emission Mask & 5.10B Adjacent Channel Leakage Power_Ratio by power reduction. Please accept this modification for comprehensive RF Performance.

A handwritten signature in black ink on a light-colored grid background. The signature is stylized and appears to be the name "Taeyang Na".
