SUBJECT: Samsung Electronics Co., Ltd.
FCC ID: A3LSPHS100
731 Confirmation No.: EA101893
Correspondence Reference No.: 21277
Request for Tech. Info.: 11/16/01

Dear Joe:

Transmitted herewith, on behalf of **Samsung Electronics Co., Ltd.** is an amendment provided in response to the request for technical information dated November 16, 2001.

1. The unit is designed with a speaker phone section that operates best when there is a 1 in. spacing between the microphone and the users mouth. The unit has been retested for this mode in the flat phantom with a 1.2cm spacing.
2. Please find the attached description for 10 gram averaging.
3. The following statement will be included in the users manual. In order to comply with FCC RF Exposure requirements always wear the watch on your wrist when the unit is transmitting and be sure that the band is adjusted tight on the wrist so that it will not slide down onto the forearm. With the exception of the wrist and hand always maintain a 1.2cm spacing between the watch and other parts of the body.
4. The wrist phantom is 2mm thick. And the depth of the liquid during the test was 6cm. Please find the attached Z-scan plots showing adequate liquid depth.
5. The unit has been retested in 15cm of liquid. Please find the attached data.
6. Please find the attached data for face SAR measured in the flat phantom with a 1.2cm spacing.

7. Please find the attached data for the retest of the wrist SAR on the highest

- channel.
8. Please find the revised summary table listing the proper limit for wrist SAR.
 9. Please find the attached revised warning statement to be placed in the users manual.
 10. Please note the manual is preliminary and that when the device is marketed the proper image for depicting the watch will be included.

We trust this information is sufficient for the immediate grant of this application. If you have any further questions, please do not hesitate to contact us.
