Subject: RE: FCC Equipment Authorization System

Mark,

You requested additional information related to the 3G\4G capabilities of this tablet as described in the grant note and Operational Description. The FCC ID is A3LXE500T1CN (N stands for model with NFC Tx) and the basic version comes with no WWAN at all; only WLAN/BT + NFC; In this SKU, the label shows FCC ID: A3LXE500T1CN.

A second version of the tablet is marketed to include 4G (WWAN) capabilities in addition to the WLAN/BT + NFC. In this SKU the label shows both the host system FCC ID: A3LXE500T1CN and also "CONTAINS FCC ID: A3LEM7700-W". A3LEM7700-W is the FCC ID for the WWAN module. The approval for that module specifically adds use in this tablet and addresses colocation and rf exposure for the WWAN module.

A third option is also available, the base model without NFC capability. This SKU has been approved under FCC ID: A3LXE500T1C.

Please let me know if the above explains it. Or, if you have any other questions. Thx.

Best Regards,

Ron Hsu - Account Executive
