LG-RD5130 SAR
Test Report Revi...

Hello Mike,

Attached is the revised SAR report. Additional test data is included.

Please kindly review.

Thank you!
Helen

Notice_content

Question #1: During head tilt position, only center channel was tested. Based upon FCC policy, only if the Sar reading at center channel is less than 3dB of 1.6W/kg, the low and high channel can be waived. In this Class II permissive change filing, Sar readings at center channel is above 0.8K/kg. Please provide low and high channel at Tilt position for left and right head.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
