Re: Block diagram & manual

Gentlemen/Ladies:

The required block diagram(s) can be found in the document file uploaded as “Theory of Operations” and when the file is opened it is titled as “BLT LAN Transceiver Theory of Operations”. CellNet sells services, which includes the installation of their equipment. There is no user manual because the consumer or customer does not install the equipment. CellNet employees refer to the Theory of Operations (mentioned above) during installation.

Sincerely,

Joyce Walker
