

Operational Description

This device is a 802.11g mini-PCI transmitter module which operates in the 2.4GHz band, the maximum data rate could be up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will be applied. This project is seeking the authorization of limited module approval specific to the mobile device such as Notebook PC with antenna mounted around the LCD pannel.

The transmitter of the EUT is powered by host equipment via a mini-PCI interface. The antenna types used in this product are Inverted F and Printed Dipole with UFL antenna connector.

The other instruction, please have a look at the users manual.
