

FCC ID: NLHRT3310

Circuit Description

The 315MHz crystal oscillator drives the base of Q1 the final/buffer amplifier. The modulation provided by IC (U2 KS57P2304). The output of Q1 has the matching network consisting of L5 and C26 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 8cm long metal antenna. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 3 Volt "LIR2450" Rechargeable primary battery
