### FREQUENCY BAND ATTESTATION

XL-185P C1D2 FCC ID: OWDTR-0149-E, 3636B-0149

The XL-185P C1D2 radio has been tested to operate in the US market per the frequency bands allowable per the FCC and Canada, however, the radio is capable to operate beyond those stated boundaries to support non-US markets. Harris has listed the complete operational frequency band within the User Manual, Operational Description, Block Diagrams and Alignment Procedure for these non-US markets.

Harris restricts users from modifying the device beyond those frequencies allowable by the FCC and Canada through radio Feature Encryption and Radio Personality Manager. Feature Encryption allows Harris to restrict the radio to only operate within the frequencies allowed by the FCC and Canada. Harris' Radio Personality Manager is a software application that also restricts the radio to only operate in the allowable FCC and Canada frequencies.

The frequency bands for which the XL-185P C1D2 radio has been tested to operate, allowable per the FCC and Canada, are listed below:

#### **FCC**

378-406 MHz  
406.1-522 MHz  
2402-2480 MHz  
2412-2462 MHz  
5180-5250 MHz  
5745-5825 MHz
